2025/0484/P	James Beveridge	04/03/2025 17:05:40	OBJ	<p>This is the usual approach by this developer ie get the foot in the door and then ask for more with the offer of a few extra scraps.</p> <p>The regimented blocks are very much Soviet style housing packed closely together with most having little outlook. The heightened blocks will increase this situation with the resultant creation of dark canyons in between.</p> <p>I appreciate that the car park could be better used for housing but I believe that any major new project should be both beautiful and give something back to the local community. This proposal fails on both counts.</p>
