2025/0827/P	Sarah Herriot	07/03/2025 13:08:56	COMMNT	Hello,

The flue vent out the top of Shaldon Mansions is directly opposite my window on the other side of Denmark Street. As it is winter at the moment I have not noticed it so much, but if I open my window, I often get fat smells from this flue into my flat, so I can't leave my window open. During warmer weather this is a problem. I cannot open my windows at the back of the flat due to the extraction units from the Flat Iron steak restaurant next door, which run from around 9am til 11:30 12:30am, so feel completely hemmed in by fat smells. My quality of life has gone down considerably since this place opened. Especially in a northerly breeze when the fumes come straight in my window from their extraction. They had assured me they have a defuser on this to eliminate the smells. It does not work.
