Dear Camden Council crew

Would you like a development like the O2 on Finchley Rd to be built near where you live?

The disruption, the traffic, the parking issues, the schooling pressure, the garbage accumulation and collection, the environmental impact, the crime and the density that it creates are all worryingly serious. I'm sure you appreciate the call of people who are affected and do not ignore it!

What has Camden done in recent years to improve the standard of life for the residents in this vicinity more than the bare minimum?

I passionately request you to throw this application out of the window and turn this precious land into schools and green spaces.

Best regards,

Maryam Irvani
