2025/0852/P	Rishi Shah	Flat 34 KingsWood Court	29/03/2025 10:00:16	SUPC	<p>The council should not allow car parking spaces. The council should push for the developer to build an entirely net zero building by using ground source heat pumps and become a heat network to serve the area.</p> <p>The council should only pass the applicant includes a public open space (.e.g Roof Garden) or general garden space.</p> <p>I'm for the development, but not for car parking and it must be built with new heating and cooling technology than incumbent technology</p>
2025/0852/P	Anna Selwyn	38 Howitt Road	29/03/2025 09:50:37	OBJ	<p>I object to the delivery and service traffic travelling over the Eton Avenue square as it will be unsafe for the many pedestrians and children using the area and will increase traffic in the local residential streets. I think it should all follow the construction traffic route from the main road (Avenue Road side).</p> <p>I also don't like the red brick cladding - this sill make the huge tower even more visible across the 6 local conservation areas and other view-points.</p>
