2025/1355/T	Ameenesh Shah	13 Lymington Road nw6 1hx	01/04/2025 15:33:18	OBJ	<p>I see no valid reasons for the removal of a healthy and mature tree that adds significant value to the conservation area streetscape.</p> <p>The excuses given for removal are that it is a non-native species and yet that does not seem to be a valid reason when it is thriving quite happily and has done for at least 20+ years (probably many more than this based on its size). This reason made all the more incongruous in that the proposed replacement is also non-native so nothing being solved by removal.</p> <p>The existing tree is a mature, slow growing and easy to manage variety and should be left in place.</p>
