

## Renaissance London

- Original or bespoke options available.
- If bespoke route explored, Renaissance would survey and size the fireplace to suit. They would also produce drawings for sign off and coordinate the hearth with the floor levels.
- Bespoke allows us to customize the details. We can choose the corner pieces, legs, hearth and stone type. We can also make it taller by possibly adding a cushion section, to help with the ceiling heights.
- Inserts would be made to fit the surround, and a simple design was agreed in order to focus on the surround.
- Material options were narrowed down to either light Calacatta marble with minimal veining or Painswick stone which is a type of limestone. This was our preferred option as Painswick provides a little warmth and isn't too yellow in tone.
- Consider a mirror over fireplace instead of painting (see next page)

Corner pieces and leg designs

Bullseye corners and lozenge legs

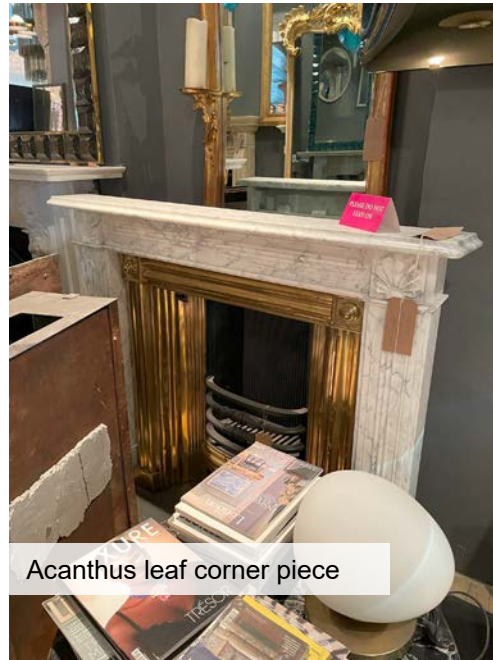

Painswick stone

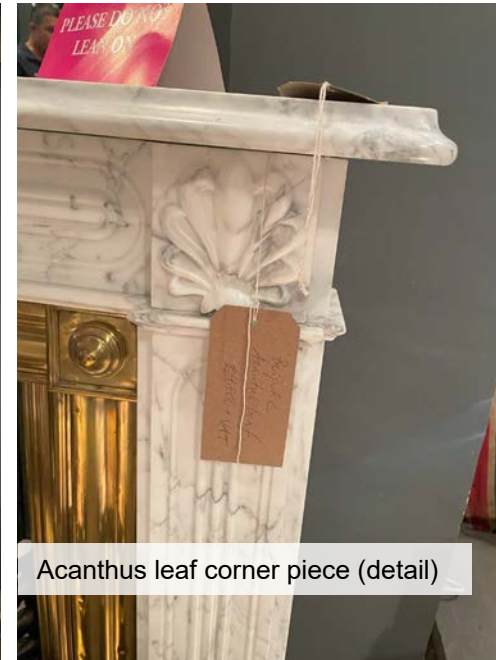

Finger fluted header

Bullseye corners with cylindrical legs

Acanthus leaf corner piece

Acanthus leaf corner piece (detail)

Fluted header / legs with bullseye corners
