Dear Sirs

With reference to my objection to the proposed felling of the Black Poplar in the garden of 16 Belsize Grove, NW3 (2025/0868/T) - I would like include images of this rare native species in full bloom in summer so that you can see how well established, healthy and handsome it is. These images were taken before it was pruned last summer.

I hope this will help with your decision.

Best wishes

Margaret Caselton
