2025/1042/T	Dr Neil Garner in	10 Mornington Terrace	04/04/2025 08:31:29	OBJ	<p>Dr N. Garner Camden resident; I am a Regent's Park volunteer, Fellow of ZSL and member of 'friends of Regents Park's and very local resident</p> <p>Please see attachments: this tree is probably as old as the Zoo and remains in beautiful health in spring summer this tree is an absolute delight...and predates Thames water considerably...</p> <p>This tree is rare one other only remaining...I understand the complex car park land loan arrangements but all parties must prevent this loss...between HS2 & Thames water the local community has sacrificed enough ecology in the contestable aim of progress</p> <p>I am but one individual, however, the Zoo, the Royal Parks and the ' friends of RP' can surely save just one beautiful and venerable tree</p> <p>0 3 3 3 2 / T73 for barhale purposes</p> <p>And...</p> <p>Hi ZSL</p> <p>Thanks for the reply regarding tree: 03332 in the Zoo car park</p> <p>I am currently awaiting a response from Regents Park and Friends of Regents Park plus other interested parties.</p> <p>I will reply fully once I hear from all parties</p> <p>However,</p> <p>I believe I am correct that ZSL CarPark and adjoining land that contains tree 03332 is owned, and is part of the Regents Park estate.</p> <p>The Zoo CarPark and adjoining land fundamentally remains part of the Royal park which is on indefinite loan to ZSL?</p> <p>If so, why is Camden CC involved?...surely permission should be sought from the Regents Park board along with the rationale for the felling of tree 03332...on the Regents Park estate?</p> <p>Permissions for ZSL's water feed may well be another matter involving Thames Water and Camden CC?</p> <p>I have lived here over 40 years...so may I politely suggest your estimate of tree 03332's age and quality may be incorrect and requires independent verification</p> <p>Best</p>

					Neil ZSL : Membership ID 4594 & Regents Park Ranger/ volunteer
					The removal of T73 / 03332 a protected tree does nothing for ZSL and their conservation drive to support the environment and allied biodiversity...ONE PERSPECTIVE HAS NOT BEEN CONSIDERED...THIS TREE IS Aesthetically BEAUTIFUL AND IN FULL HEALTH AND ONE OF ONLY THREE REMAINING IN THE ZSL CAR PARK.
					Just one more thing...I have contacted tree allocation at Camden Council...It seems barhale have already gone ahead with much of the foliage clearing ahead of planning permission....IS THIS....APART FROM T73/03333 a retrospective planning application...could a site visit be made to verify this
