Our house shares a wall with the public house situated at 25 Rathbone Place and the construction affects us. We would like to know the duration and the timing of the works as we work from home and to understand the impact their proposed work will have on us during the installations and how the applicant proposes to mitigate the noise risk for us.</p> <p>We are happy for the proposed work to continue provided there is an alternate arrangement for our work to be moved to a different place during the duration of their installation.</p>
