To whom this may concern

I live very close to the Cantelowes gardens park .. I overlook the park on Pandian way .

I oppose the application for the pay to play pickle ball courts that are being proposed at Cantelowes gardens .

The park struggles for benches and space for families and taking away a much loved sandpit space and benches for children is not beneficial for the community .

As i have stated in this email I overlook the park and noise is also a daily issue already with road , football, Camden school for girls using it during the week (screaming) the skatepark and basketball ball courts .

Another ball game using wooden paddles will just add to the noise pollution in this area.

Have you ever actually heard the noise that comes from this game ?

I work nights so sleep during the day is essential .

So I oppose this proposal of the courts all together in cantelowes park , not just the location and removal of the sandpit but to the courts being placed here at all .

It does not benefit the close by community.

The football is enough to deal with without taking away more green space for profit .

We need to keep our green space GREEN !

Regards

Helen Newbery
