2025/1535/P	Edwin Heathcote	49 Calthorpe Street London WC1X 0HG	19/04/2025 16:22:59	OBJ	<p>It is unclear from the drawings what the cladding material of the extended plant room will be. If it is to be highly reflective (as much of the building's polished cladding already is) this might have a direct result in reflected glare on our rear rooms. It also looks as if the extended roof profile will block out some natural light from the rear of our property.</p> <p>It looks a pretty ill-considered elevation drawing and design for such a prominent and visible roofscape.</p>
