Subject: Intended works to Tree in Conservation Area Ref: 2025/1435/T

Application Reference: 2025/1435/T

To Whom it may concern

Regarding the removal of the Goat Willow tree in the NW6 3HB Conservation area, this beautiful tree has been there for decades and there are several separate trunks in the surrounding ground that it stems from (3 or 4 trunks).

Not only is it a beautiful asset to the garden, it hides many of the houses directly behind it.

So many trees have been destroyed in recent years along this strip of back gardens.

Does the whole tree have to be removed?

What is the purpose of the removal?

Can options be discussed?

Thank you
