Subject: 2025/1440/T: Garden Flat 19 College Crescent London NW3 5LL

For the Belsize Society: we object to the proposed felling of the cherry tree. This is a mature, attractive tree, highly visible on College Crescent, and it makes a positive contribution to the neighbourhood. College Cres is a busy road and, as well as visual amenity, the tree provides some protection against traffic pollution. The preservation of remaining mature trees should be given high priority in such an area and the tree should take priority over any damage to the boundary wall between 19 College Cres and its neighbour.

It is unclear from the application whether or not this tree already has TPO status; if not, we request that consideration is given to granting a TPO and that felling of the tree is refused.
