

Overall: As we are adding a new bathroom in the middle floor, it is really going to help with air ventilation and energy usage by adding a small 1m X 0.6m window. We will ensure the window is opaque and the bottom is fixed shut.

We can find multiple roads that mirror ours where there are either 2nd story of 3rd story outward windows that face houses on either Mansfield Road or Savernake Road. There are also many more like this on different local roads but those on Estelle, Shirlock and Courthope are almost identical examples of what we want to do. Also as you can see from the Rona Road pictures on page 4 onwards, due to the gap between Mansfield Road and 1 Rona Road you can already see from the street into all of the house on Mansfield Road. We can also already see into all of the houses already on Mansfield road from either our 2nd story balcony or our 3rd story balcony.

Estelle Road

Both the houses at the start of Estelle Road that mirror ours have windows that face houses on Mansfield Road. Please see the windows below and then the houses they face in the image below.

Rona Road

Currently due to the large gap between Mansfield Road Houses and ours at 1 Rona Road, you can already see into all the windows on Mansfield Road from the street. We can also already see into the houses from our 2nd story terrace and our 3rd story terrace.

View from our 2nd story terrace.
