

Dear Planning team

I kindly ask that this objection is not published on the planning portal.

Air conditioners are un-environmental. Cooling of buildings can be achieved by closing blinds and curtains during the day time when the weather is hot. Also by opening windows during the evening and night time so that cool air can enter the building.

The neighbouring house will suffer noise pollution.

The property is in a conservation area and visible air conditioners are unsuitable. Recently, a few air conditioners have appeared on roofs. On Redington Road an air conditioner on the side of a roof is visible from the public pavement. This trend should be stopped, if we wish to retain the pleasant visual amenity of the area.

Kind regards

Jan
