| T25                 | 1            | Ailanthus altissima<br>Tree Of Heaven | 18.0       | 36       | 11.0               | Moderate | Early<br>Mature | Fair                       | Fair                    | Building within<br>falling distance of<br>tree. Neighbouring<br>property in falling<br>distance. | Buttresses / buttress roots - Minor adaptive growth / moderate development. Crown conflict - Structure / boundary / wire / tree. Deadwood - Minor. Exposed crown - Recent. Fork - Suspected structurally sound. Leaning trunk - Minor. Pruning wounds - Historic. Root environment - Restricted. Stems - Sub-dominant. Suppressed crown - Minor. Unbalanced crown - Minor. Crown - Recently exposed to the southeast due to the removal of an adjacent large tree.<br>Deadwood - Several small diameter sections of deadwood within central crown. Risk assessed as low. Removal would be appropriate. 29/04/25.<br>Reduce lateral limb / limbs extraneous, subsiding lateral branches to the southwest at 3, 4.5, and 8 m, by 1.5 - 2 m to reduce loading and re-balance crown following the removal of an adjacent tree causing crown exposure. | Within 1 year 29/04/26 |     |
