2025/1684/P	Anthony Rawcliffe	45 Queen Alexandra Mansions  WC1H 9DQ WC1H 9DQ	21/05/2025 14:53:35	OBJ	<p>I object to this application.</p> <p>The application seems in reality to be a change of use from an office building with laboratory-enabled facilities and a café open to the public to a fully functioning biochemical laboratory with offices and meeting rooms.</p> <p>There will be no publicly accessible café on the ground floor.</p> <p>There will be toxic and unpleasant gas waste released into the air metres from the windows of my flat (and lots of others).</p> <p>In my view, this means the application should be referred to full Planning Committee for proper scrutiny to ensure:</p> <ol style="list-style-type: none"><li>1. Protection for residents from dangerous and toxic being discharged;</li><li>2. Protection for residents from noise;</li><li>3. Proactive protection of residents given that legislative protection is retrospective in effect.</li></ol> <p>Thanks</p>
