2025/2085/T	John and Rosemary Emanuel	20 Regents Park Road NW1 7TX	28/05/2025 12:12:30	OBJ	We object to the felling of the pear tree in the garden of our neighbour at 17 St Marks' Crescent, NW1 7TU. The tree is particularly beautiful and stands at the end of our small garden where it enhances the green area shared by rear gardens in St Marks Crescent and Regent's Park Road. It also gives us some privacy and protects us from multiple overlooking from St Mark's windows. A number of larger trees in the area have been lost in recent years and the pear tree in one of the remaining mature trees supporting the meagre bird life in the area. Its loss would be significant, reducing the beauty of multiple rear gardens. We value the small number of trees also for their adsorption of CO2 and for their sound absorption in the city environment. In our opinion, felling the entire much-loved tree would be pointless and very sad.
2025/2085/T	Michael Burton	22 Regents Park Road NW1 7TX	28/05/2025 16:46:53	OBJ	I would like to object to this application. My garden at 22 Regents Park Road borders onto the side of garden of 17 St. Mark's Crescent so our view from the rear of the house and garden is very much dominated and enhanced by that garden. The pear tree concerned forms part of the a beautiful view of city trees in this very busy borough and i'm sure contributes to CO2 reduction to help balance the heavy traffic on our road.
2025/2085/T	Local Resident	Regents park road	28/05/2025 19:06:49	ОВЈ	I would like to express my strong objection to this tree being cut down. It is one of the very few green spaces visible from my window, and it plays a significant role in supporting my mental health and overall wellbeing. The presence of greenery has a well-documented positive impact on mental health, and in an urban environment, such views are incredibly valuable.  I would also like to highlight Camden Council's publicly stated commitment to protecting green spaces and promoting environmental sustainability. Removing a healthy, established tree would seem to run counter to these principles, especially at a time when preserving urban greenery is more important than ever.
					I respectfully urge you to reconsider this proposal and explore alternative solutions that allow the tree to remain in place.
