2014/0858/P	B Bennett	156 Agar Grove London  NW1 9TY	26/02/2014 10:07:33	OBJ	Dear Fergus Freeney I am writing to object to the proposed conversion of this basement floor at 162 Agar Grove, London, NW1 9TY. The proposal would be inappropriate for this rare surviving original early Camden building in a conservation area. It would significantly change the appearance. The proposed upvc double glazed windows are completely unsuitable for the front of this historic building in material, shape, positioning and style. Other original windows in the same building on the first and second floors above seem to have been changed from the original timber multiple astragal type windows without planning permission. The proposed railings and entrance would also significantly change the front appearance and take up space from the pavement.
