2014/0150/P	Ms Angel Daden	12 Pedrell House New Compton Street London  WC2H 8DF	13/02/2014 17:17:00	OBJ	<p>This plan will block the light to Pendrell House, block light to protected trees in St Giles Churchyard, making it more dark and damp at a time when they are redeveloping it, and the children's playground for local children to enjoy. Denmark street in a conservation street, and is encroached and endangered by the excessive development around. The local community needs to enjoy what little light and nature areas there are.</p> <p>The development of the St Martins art school on Charing Cross road, has already impacted the late winter light that used to make it down phoenix Street. 2 stories higher has stopped that. Building high, impacts the light and the beauty of a day is lost, as those daily moments of light are obliterated!</p> <p>Many peoples enjoyment destroyed for someones profit.</p>
