2014/0617/P	Ms Margaret Hobday	126 South End Close	15/02/2014 20:35:41	OBJ	<p>I would like to know how contractors will be accessing the site in respect of the proposed residential extension outlined in the planning application for 73 Constantine Road. If the presumption is that access will be granted to contractors and their vehicles via South End Close at the rear of 73 Constantine Road, I object most strongly. Such access would result in unacceptable disruption to the residents of D Block (no's. 121-140) South End Close. Access to the rear of 73 Constantine Road could only be along a narrow footpath used by a number of elderly and disabled residents in D Block and then through a private garden. Furthermore, the closest contractors vehicles could park would be about 100 metres from the construction site in a designated no parking at any time area. Any equipment and materials would then have to be moved along the aforesaid narrow path with the resultant debris and damage to the foot path and private garden.</p> <p>Allowing access to the site via South End Close would result in the majority of disruption being felt by residents in South End Close with little or none to those in Constantine Road.</p> <p>Also. would the planned excavation and building result in ground disturbance in and around 121-140 South End Close or, indeed, impinge on the privacy of the existing adjacent flats.</p>
