

STELLA GIBBONS

LISTED BUILDING CONSENT APPLICATION INFORMATION

Design, Manufacture and Fixing

The Heath & Hampstead Society plaques are oval in shape.

The proposed size of the plaque is 650mm x 330mm. They are fabricated from 3mm thick solid sheet aluminium; they are relief etched with a raised border and text.

The plaques are stove enamelled, with an antique black background and ivory lettering.

The plaques are surfaced mounted using either of the following methods:

- **face fixed** – screw fixed into a wall using two screws
- **rear stud fixed** – using four studs behind the plaque which are screwed into a wall, there are no visible fixings.

This latter method is usually favoured. With either method the installation of a plaque has no impact upon the fabric of the building.
