Approach from Agar Grove East

This view shows Plot JKL, which anchors the northeast corner of the masterplan. To the right, Plot I can be seen further down Agar Grove, helping to re-establish the historic street pattern and balance the section of the street. On the left of the image the tower of Plot B2 can be seen towards the south of the site.

View Over the Arrival Square

This view from a balcony in Plot I shows the arrival square in front of the Childrens' Centre, framed by Plot CDE on the left and Lulworth on the right. The square will be trafficable by vehicles- but priority will be given to pedestrians. A tree-lined playspace in the middle of the square has an enclosure that allows for safe play.
