Corner of the Arrival Square

The Community Arch in the plinth of Plot B is visible at the corner of the square. The arched form is intended to be easily recognisable to visitors. Plots B and CDE frame the east-west route from Camley Street to Wrotham Road.

The Triangular Park

This view from one of the balconies in Lulworth shows the new park that will be also framed by Plot A on the left and Plot F on the right. The routes around the park will allow for service vehicle access- but will prioritise pedestrian and cycle movement. The park will be planted with trees and 'rain gardens' as well as providing a MUGA for ball games. The tree in the middle will be retained from the existing stock of trees on site.

Agar Place and the Triangular Park

Plots G (on the left) and A (on the right) frame the public route to the triangular park in front of the west façade of Lulworth. The public realm will be well-planted, and emphasise pedestrian and cycle movement over service vehicle access.

The new glazed lift core to Lulworth can be seen that will activate the building and provide views back over the park.
