→ The proposed building is out of step with the rest of the area, which is a conservation area. Both in scale and style, ~~the~~ it will be very different to other buildings and housing in the area.

— As I am at home during the day, I'm very concerned about the noise I will be subject to during the construction period. This may go on for many months, and will be very aggravating to me, and many other residents who live nearby, as well as to people who work nearby. Children in the French School will also be adversely effected.
