Response:

I fully support the application. This proposal will significantly improve the insulation of the the existing flats and should be approved because of its contribution to sustainability, reducing CO2 and adverse climate change. I urge planners and the planning committee to approve it

I am extremely pleased we are proposing to carry out the design and building fabric improvements. I would expect to save considerably on heating bills and look forward to have a dedicated bike space - its not much fun having to bring the bike up in the lift and park it in my lounge.

I fully support this planning application and strongly urge Camden to approve it. I have owned and lived in my flat for over 10 years. The building and surrounding area are strongly in need of major refurbishment. This proposal will deliver a significant enhancement which will be to the benefit not only of residents of Kings College Court but will also lift up the area. Compared to the original planning application, this new scaled-down application will cause minimal inconvenience and will retain the building's aesthetic, whilst providing convenient cycle parking.
