Existing high and low voltage cables to be bonded in by UKPN approved contractor

Fig 8

CONSTRUCTION RISKS	MAINTENANCE / CLEANING RISKS	DECONTAMINATION RISKS
In addition to the hazards risks normally associated with the type of work detailed on this drawing take note of above construction working, where appropriate, to any other risks which may be encountered.		

NOTES

The basement area waterproof tanking requires confirmation. Minor alterations to the principle layout may be required to move habitable rooms away from retaining basement walls.

All racking and Store layouts will require review by UKPN and are drawn to give an appreciation of the space. No racking has currently been shown in the following rooms: Filters Workshop, Filling or Tackle Store.

Ramps to lightwell areas have been drawn to create a 1:20 gradient based on a 120mm difference between the external and internal floor levels. UKPN to confirm suitability of gradient.

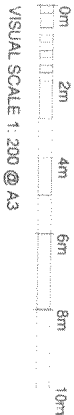

Fire Core 30 mins
There are known potential risks of live cables overhead in several locations, assessment of how this will be managed.

The drawing is for information purposes only and should be treated as design development. UNDER NO CIRCUMSTANCES MUST IT BE REPRODUCED OR USED FOR CONSTRUCTION PURPOSES.
