Response:

The door in question i.e. that relates to this planning application has already been bricked up before the consultation has finished. How is this allowed? The door relates to a commercial business B1 not the front elevation of an existing house C3. The planning application is misleading and should be refused on this basis. It appears that the applicant does not feel that they need to follow the due process like everyone else. What enforcement action is being taken? I do not support this application and would ask that it is refused. Please inform me of the committee date.
