Tell me more about the map data:

Pollution Incidents

Find out how we categorise incidents and their possible effects on health and the environment

Industrial Pollution

Find out how we monitor and control the releases produced by industrial processes

Pollution Hazards

Every industrial process is potentially risky to human health and the environment. Find out how we measure this risk and how we score operators on their environmental performance

Mining Waste

Closed mining waste facilities pose serious environmental impacts. The map states the cause of the impact: either water pollution, harm to human health, instability or fire hazard.
