Response:

I would like to disagree for change of use to the above premise, since they change to a new owner last year, they have change the premise from a cafe into a shisha smoking place(which I m not sure is permitted or not) and won't close the shop until at least 2am in the morning, which making far too much noise and the smell of burning charcoal and smoking shisha is always affect everyone around there. Therefore I would like them to remain as a cafe(A1) which only allow to open till 8pm everyday.

Response:

Objection based on two criteria:

1. This business is located directly below several blocks of retail premises. The nature of the business produces considerable noise (people) and odour (sheisa pipes) is a continued nuisance to all residents living nearby and means front windows can no longer be opened without strong odours entering the premises.
2. This business makes a mockery of the planning process in that it already as of today remains open until 2 am every evening – on a weekend this can be as late as 4am. This is completely out of character with the local area and means that the above noted nuisance extends late into the evening.

Therefore I strongly suggested this proposal is rejected and Camden council invest some more effort into ensuring the business operates within its current licensed hours rather than seeking to make any alterations.
