Dear Sirs,

REF: 2013/4684/INVALID. RE: 1 Maygrove Road, London, NW6 2EE – Replacement of existing external timber windows and door frames with white UPVC frames and double glazing on the rear elevation.

Please find enclosed existing and proposed drawings including the sections for windows and doors, drawing schedule and ordnance survey map for the above named property.

The property is located close to Kilburn tube station. It is currently not occupied and the existing windows and door on the external rear façades are in a state of despair. The proposal will transform the property. The chosen material offers a cost effective solution; UPVC is durable and requires less maintenance work.

I hope you will find the provided information to your satisfaction and I shall be grateful for planning permission to be granted. Please do not hesitate to contact me for further information.

Yours sincerely,

Trang Vu
