**Response:**  
It is pretty clear that this application is being used to get consent not only for 2 additional linking units but also for the revised elevation to Hartland road gardens namely without screens as consented & also with differing fenestration & cladding at the upper level.

The roof has been in existence for close to a year & still no green roof. This is my only view & I am not happy. I don't understand how this building is open for business when it is not complete.
