

Dimensions to be checked on site. Existing pier to be retained if possible. Otherwise pier to be demolished, bricks and capping retained and new pier constructed to allow for pedestrian and vehicular gates

0 1 2 3 4 5

KEY

- Existing fence / gate retained. Type and height varies
- Fence: Lace Fence panels 1.8m high (approx. refer to detail drawings) installed above existing boundary wall. Gates: Timber clad gates (fair faced to both sides with Lace Fence panels above. Shop drawings to be produced for approval by CA prior to fabrication.
- 2m high fence to match boundary gates: Steel structure with timber clad infill. Height: 2m. Shop drawings to be produced for approval by CA prior to fabrication.
- 2m high timber hit and miss fencing by Jackson's Fencing. Matching gate on steel frame. Shop drawings to be produced for approval by CA prior to fabrication.
- 2m high weldmesh fence with matching pedestrian gate. Shop drawings to be produced for approval by CA prior to fabrication.
- New weldmesh ballstop fence. Above existing retained wall: Fence installed above wall to create an enclosure height of 3m from inside ball court. In front of new glass brick wall: Separate fence installed on posts in front of wall to 3m in height. Double gates to match. Shop drawings to be produced for approval by CA prior to fabrication.

NOTE:  
Do not scale from drawing.  
Read in conjunction with relevant engineering, services and architectural layouts.

**Agincourt Gate Schedule**

Gate No.	Fence Type	Gate Type	Width	Access Control
1	Existing Boundary Wall	Existing pedestrian gate to be refurbished	N/A	Electronic door release, manual opening, intercom link to reception.
