Appendix 6	Proposed Basement Plan

1.0 INTRODUCTION

- 1.1 Bellamy Roberts LLP has been instructed by PKS Architects, to review the highway and transportation aspects of a proposed residential scheme at Belsize Lane, Camden.
- 1.2 This proposals include the construction of 7 apartments and the provision of 19 basement car parking spaces and 10 cycle spaces.
- 1.3 **Section 2.0 considers** the relevant local and national transport policies, including those on car and cycle parking found within the document entitled "Camden Development Policies 2010" and the Replacement London Plan.
- 1.4 **Section 3.0** discusses the application site in terms of its existing use as well as its location with regard to the local highway network and sustainable modes of travel. **Section 4.0** sets out the proposal.
- 1.5 The aspects of the proposals that are pertinent to this highway and transportation review are considered in detail within **Section 5.0**. These items include the proposed highway access, on-site parking provision and refuse/recycling collection.
- 1.6 **Section 6.0** draws together a set of conclusions.

2.0 TRANSPORT POLICIES

National Policy

2.1 The Government has recently (March 2012) published new and more concise planning policy guidance which supersedes the majority of the Planning Policy Guidance Notes and Planning Policy Statements. The new policy document National Planning Policy Framework (NPPF) at paragraph 29 states:

“Transport Policies have an important role to play in facilitating sustainable development, but also in contributing to wider sustainability and health objectives. Smarter use of technologies can reduce the need to travel. The transport system needs to be balanced in favour of sustainable modes, giving people a real choice about how they travel”.

2.2 Paragraph 32 of the NPPF states:

“All developments that generate significant amounts of movement should be supported by a Transport Statement or Transport Assessment. Plans and decision should take account of whether:

- *The opportunities for sustainable transport modes have been taken or depending on the nature of the site, to reduce the need for major transport infrastructure.*
- *Safe and sustainable access to the site can be achieved for all people; and*
- *Improvements can be undertaken with the transport network that can effectively limit the significant impacts of development. Development should only be prevented or refused on transport grounds, where the cumulative impacts of development are severe”.*

2.3 It is with consideration of this new Government Guidance that the proposals at Belsize Lane, Camden have been assessed.

2.4 The current highway standards for the access are laid out in accordance with Volumes 1 and 2 of Manual for Streets, whilst national guidelines for basement parking facilities is contained within *"Design recommendations for multi-storey and underground car parks"*.

Regional

2.5 The London Plan has been recently revised, and has been approved by the Communities Secretary. The document sets out policies primarily intended to deliver *"a city where it is easy, safe and convenient for everyone to access jobs, opportunities and facilities with an efficient and effective transport system which actively encourages more walking and cycling..."*. A number of policies within the London Plan are relevant to the proposed development.

2.6 Policy 6.1 indicates that *"the Mayor will work with all relevant partners to encourage the closer integration of transport and development by: Encouraging patterns of development that reduce the need to travel, especially by car; seeking to improve the capacity and accessibility of public transport, walking and cycling, particularly in areas of greatest demand; and supporting measures that encourage shifts to more sustainable modes"*.

2.7 Policy 6.9 states that *"the Mayor will work with all relevant partners to bring about a significant increase in cycling in London, so that it accounts for at least 5% of the modal share by 2026. He will:*

- *Identify, promote and complete the Cycle Super Highways; and*
- *Implement the central London cycle hire scheme and identify potential sites for expansion and/or additional stand alone schemes in outer London"*.

2.8 In relation to car parking, Policy 6.13 indicates that *"the Mayor wishes to see an appropriate balance being struck between promoting new development and preventing excessive car parking provision that can undermine cycling, walking and public transport use"*.

2.9 The current parking standards are set out within Table 6.2 of the Adopted London Plan, suggests the following car parking provision:

4-bed unit	1.5 – 2.0 spaces
3-bed unit	1.0 – 1.5 spaces
2-bed unit	less than 1 space per unit

2.10 The standard goes on to advise that adequate spaces should be provided for disabled drivers and that 20% of all spaces should be for electric vehicles, with an additional 20% passive provision in the future.

Local

2.11 At the local level, Camden Council published a collection of planning documents in November 2010 that together with more recently published documents form part of the Local Development Framework (LDF). This replaced the superseded Unitary Development Plan (UDP).

2.12 The document "Camden Development Policies 2010" which forms part of the LDF identifies policy DP18 – Parking Standards and limiting the availability of car parking, which states the following:

"The Council will seek to ensure that developments provide the minimum necessary car parking provision. The Council will expect development to be car free in the Central London Area, the town centres of Camden Town, Finchley Road/Swiss Cottage, Kentish Town, Kilburn High Road and West Hampstead, and other areas within Controlled Parking Zones that are easily accessible by public transport. Development should comply with the Council's parking standards, as set out in Appendix 2 to this document. Where the Council accepts the need for car parking provision, development should not exceed the maximum standard for the area in which it is located (excluding spaces designated for disabled people).

Developments in areas of on-street parking stress should be 'car capped'. For car free and car capped developments, the Council will:

- a) *limit on-site car parking to:* – spaces designated for disabled people,
– any operational or servicing needs, and
– spaces designated for the occupiers of development specified as car capped;
- b) *not issue on-street parking permits; and*
- c) *use a legal agreement to ensure that future occupants are aware they are not entitled to on-street parking permits.*

Developments will also be expected to meet the Council's minimum standards for cycle parking set out in Appendix 2. The Council will:

- d) *strongly encourage contributions to car clubs and pool car schemes in place of private parking in new developments across the borough; and*
- e) *seek the provision of electric charging points as part of any car parking provision."*

- 2.13 That document continues, at Appendix 2, to identify that one cycle storage space should be provided per residential unit and a maximum of 0.5 parking spaces could be provided per dwelling for areas within Controlled Parking Zones that are easily accessible by public transport.

3.0 SITE DESCRIPTION AND LOCATION

Site Description

- 3.1 The application site, illustrated at **Appendix 1**, consists a block of 18 garages situated to the south of Belsize Lane, Camden. The site is accessed via a vehicular crossover.

Accessibility - Pedestrians

- 3.2 The site is well located to take advantage of the pedestrian facilities in proximity. Belsize Lane is subject to good footways either side of the

carriageway with both dropped kerb crossings and raised crossings along the pedestrian desire lines.

Cycling

3.3 Transport for London publish a number of cycling guides illustrating the London Cycle Network, these guides highlight Belsize Lane as a route recommended for cyclists as illustrated on the extract at **Appendix 2**.

3.4 The above highlighted cycle route links with other routes within the area which provide access to the LCN and many destinations to include residential, employment and leisure areas.

Public Transport - Bus Service

3.5 The application site is well served by public transport with bus stops, either side of the road, within just 270 metres of the site. These stops serve route No. 268 and has the provision of a shelter with timetable information.

3.6 Moreover, there are additional bus stops on Haverstock Hill which is within 450m of the site which serve service Nos. C11, 46, 168 and N5.

3.7 All the above mentioned services are summarised in Table 3.1 below, whilst the timetable information is attached at **Appendix 3**.

Table 3.1
Summary of Bus Services

Routes	Destinations	Average number of services per hour during the day
268	02 Centre - Golders Green Station	5
C11	Brent Cross - Archway	8
46	St. Bartholomews Hospital - Lancaster Gate	6
168	Dunton Road - South End Green	8
N5	Euston - Edgware Station	Night Bus

Train Services

- 3.8 The site is within 600 metres of Belsize Park Tube Station, 0.95 km of Finchley Road tube station and 1.25 km of Finchley Road and Frognal overground station. These all fall within 1.25 km which is considered a reasonable walk distance for commuting as detailed within Table 3.2 of "Guidelines for Providing for Journeys on Foot" published by the Institute of Highways and Transportation.
- 3.9 Table 3.2, summarises the services accessible within close proximity whilst timetable information is attached at **Appendix 4**.

Table 3.2
Summary of Rail Services

Station	Service	Destinations	Average number of services per hour during the day
Morden - Edge	Northern Line	Morden - Edgware	15
Finchley Road	Jubilee Line	Stratford - Stanmore	21
	Metropolitan Line	Amersham/Chesham - Aldgate	16
Finchley Road/ Frognal	Overground	Stratford - Richmond/Clapham	6

PTAL

- 3.10 Transport for London (TfL) utilise the Public Transport Accessibility Level (PTAL) when assessing the accessibility of sites by public transport services. The methodology applies mainly to destination ends as it is a quick assessment to determine the location of a site relative to public transport services.
- 3.11 The detailed report is attached at **Appendix 5**, and for ease of reference, the redevelopment site scores an accessibility index of 15.87. This equates to a higher than average PTAL rating of 4 (range is 1 -6b). As such, the site is located in a very sustainable location.

Local Highway Network

- 3.12 As stated previously, the application site is to the south of Belsize Lane, which is subject to a 30 mph speed limit. To the east, Belsize Lane is subject to permit parking only within designated bays Monday to Friday between the hours of 9:00 am and 6:30 pm and Saturdays between the hours of 9:30 am and 1:30 pm.
- 3.13 To the east, Belsize Lane is subject to "pay at machine" bays between the same hours with a maximum stay of 2 hours.
- 3.14 Belsize Lane connects to the A502, Haverstock Hill to the east and the B511, College Crescent to the west. The site lies within a Controlled Parking Zone (CPZ)

4.0 PROPOSALS

- 4.1 As stated in the introduction, the proposals are for the construction of 7 apartments; 3 two bed units and 4 three bed units, on land previously occupied by 18 garages.
- 4.2 It is proposed to provide 20 parking spaces within the basement, to include 1 for mobility impaired drivers, along with 10 cycle storage spaces.

Highway Access

- 4.2 As illustrated on the plan at **Appendix 6**, in order to allow access to the proposed scheme, the vehicular crossover is to be maintained, albeit the width is to be reduced in line with the ramp that is to be provided down to the basement level.
- 4.3 The access ramp is to consist of 3 metre transitions, at a gradient of 1 in 12, either side of a 6 metre straight section at a gradient of 1 in 6. As such the fall of the ramp to the basement level parking facility equates to 1.5 metres. And

confirms to the guidance set out within the Institute of Structural Engineers recommendations for underground car parks.

Refuse/Recycling Collection

- 4.10 A refuse and recycling store is to be provided within the basement which is accessed via a platform lift to ensure that collections do not have to be made via the access ramp. The access to the platform lift is situated adjacent to the vehicular access and is therefore ideally located for collections.

5.0 CONSIDERATION OF PROPOSALS

Access

- 5.1 The existing access has been in operation for many years without any road safety concerns and therefore the continued use will not be detrimental to the local highway network.
- 5.2 The ramp that provides access to the basement level parking facility consists of a 6 metre straight section at a gradient of 1 in 6 along with 3 metre transitions at the top and bottom at a gradient of 1 in 12. Guidance contained within "Design recommendations for multi-story and underground car parks", published by the Institute of Structural Engineers, identifies that the maximum fall of a straight ramp at a gradient of 1 in 6, should equate to 1.5 metres.
- 5.3 Therefore the proposed ramp accords with the guidance for public car parks.

Cycle Parking

- 5.4 The proposals for 7 residential units are to provide sufficient space for the secure storage of 10 bicycles. This equates to 1.43 per unit which is greater than the minimum provision detailed within local standards.
- 5.5 The local standards contained within Appendix 2 of the Camden Development Policies 2010, identify a requirement of 1 cycle storage space per residential

unit. The provision of three additional cycle storage spaces will assist in promoting sustainable travel utilising the London Cycle Network.

Vehicle Parking

5.6 It is understood that the 20 parking spaces that are to be provided on site include a provision of 18 for the existing users of the garages.

5.7 As such, the proposal will not result in a displacement of the existing parking that takes place at the garages.

5.8 It is proposed to provide just 2 parking spaces for the 7 residential units; one of which is for mobility impaired drivers. The proposed parking provision therefore equates to 0.29 spaces per unit.

5.9 This provision accords with local guidelines discussed within Section 2, that allow a maximum of 0.5 spaces to be provided per unit.

5.5 In view of the site being in a location with good accessibility by non-car modes of travel, within an area subject to an above average PTAL level and that lies within a Controlled Parking Zone, no overspill on-street parking is likely to occur as a result of implementation of the proposals.

6.0 CONCLUSIONS

6.1 This report has been prepared on behalf of PKS Architects and addresses the highway and transportation issues arising from the proposed scheme.

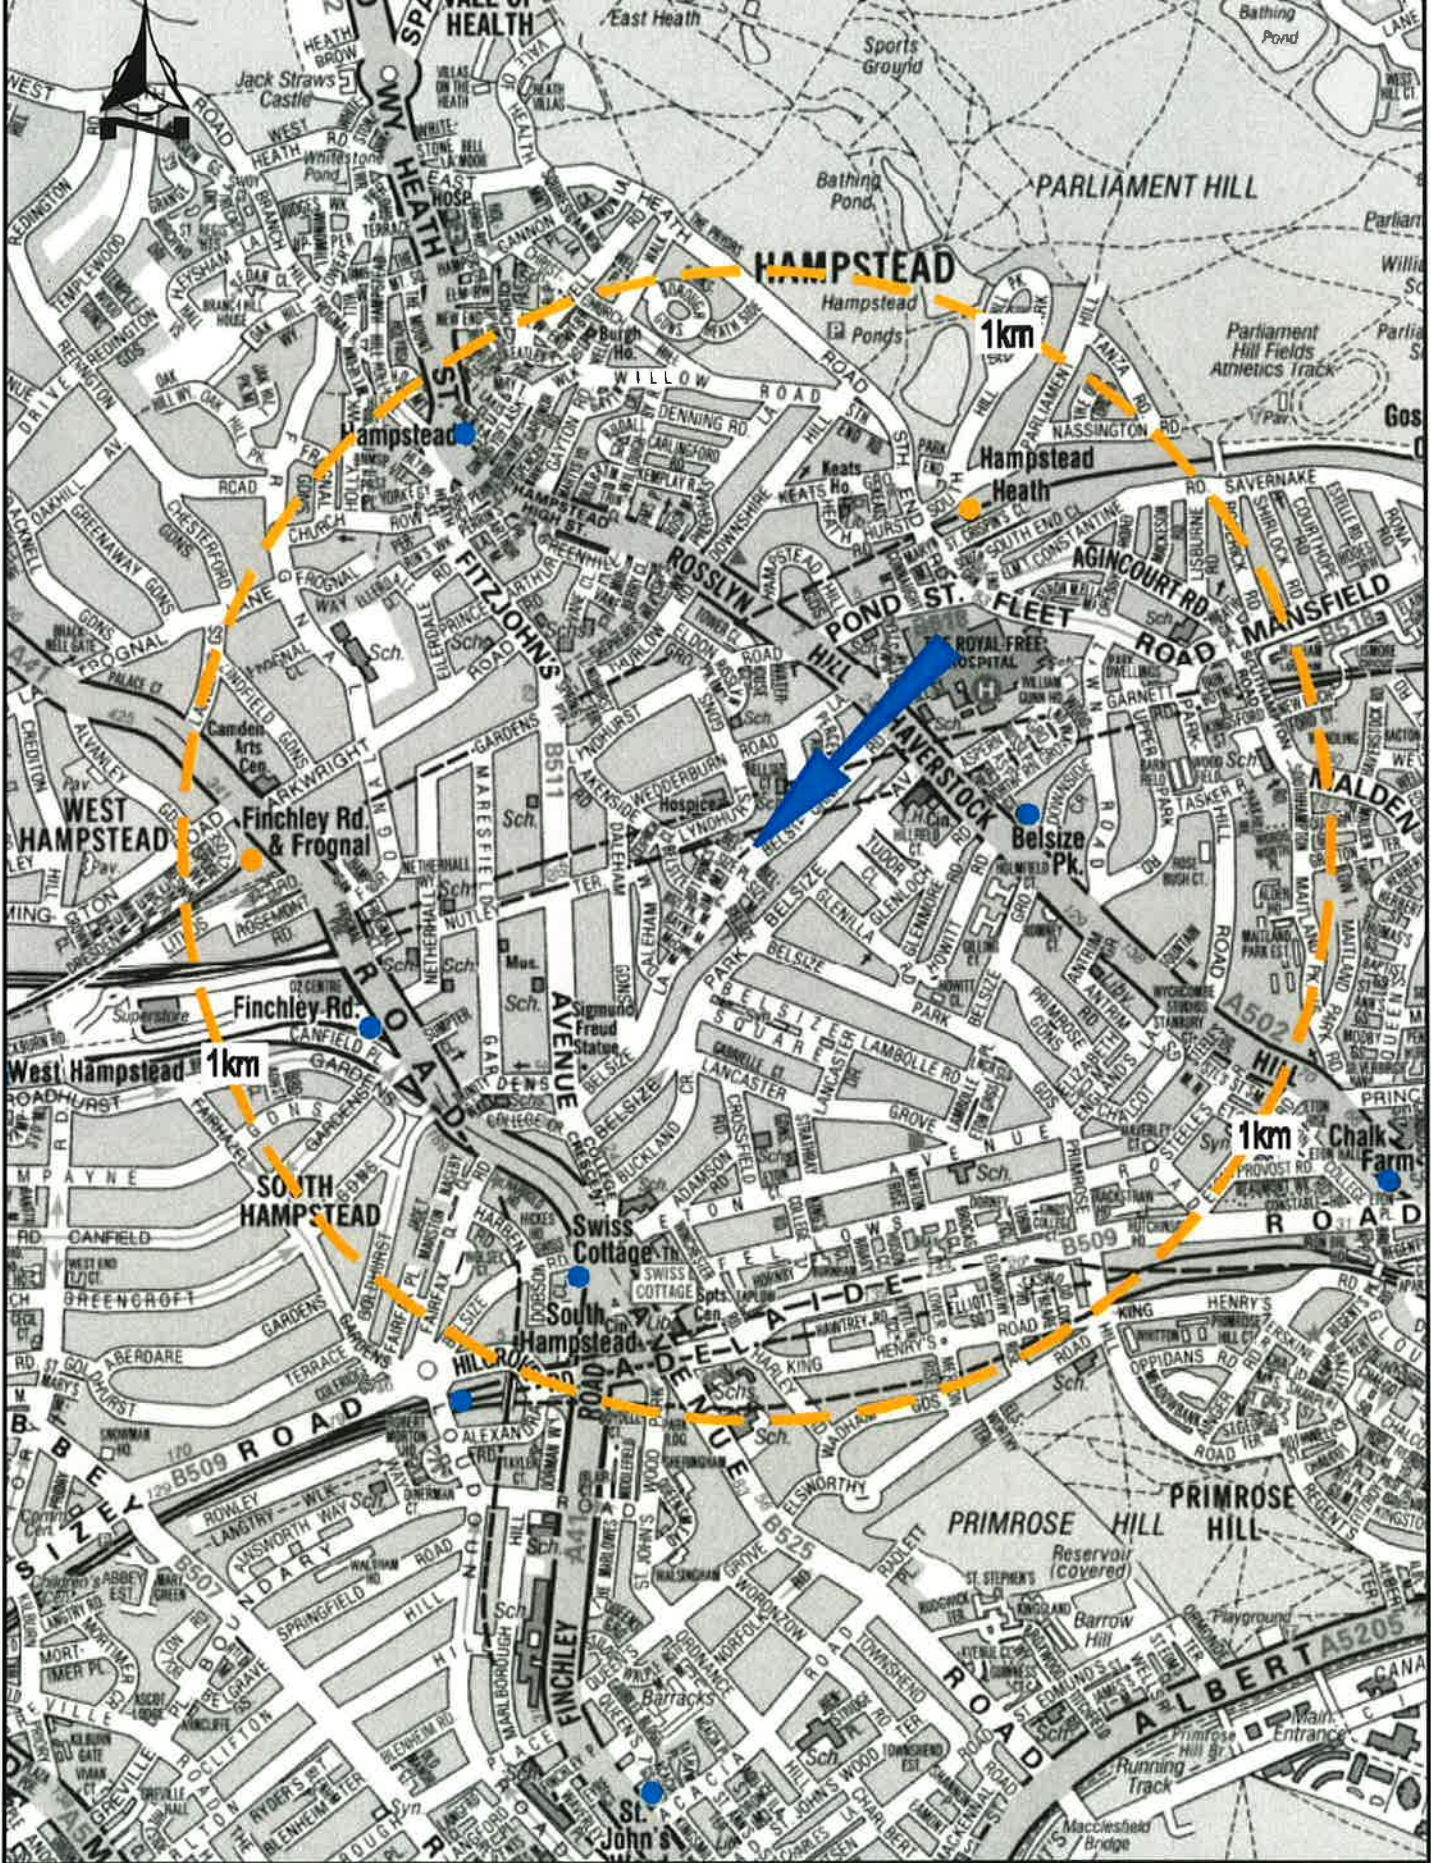

6.2 The redevelopment proposal replaces a number of garages with 7 residential units with a parking facility at basement level. The parking provision accords with local guidelines and will not result in any overspill parking on the local highway network.

-
- 6.3 The proposals provide a sufficient amount of cycle storage spaces for the 7 residential units in excess of the amount required by local standards.
- 6.4 The scheme therefore raises no significant highway concerns, and should not warrant a highway reason for refusal.
