Application for tree works: works to trees subject to a tree preservation order (TPO) and/or notification of proposed works to trees in a conservation area.

Town and Country Planning Act 1990

You can complete and submit this form electronically via the Planning Portal by visiting www.planningportal.gov.uk/apply

Publication of applications on planning authority websites

Please note that the information provided on this application form and in supporting documents may be published on the Authority's website. If you require any further clarification, please contact the Authority's planning department.

Please complete using block capitals and black ink.

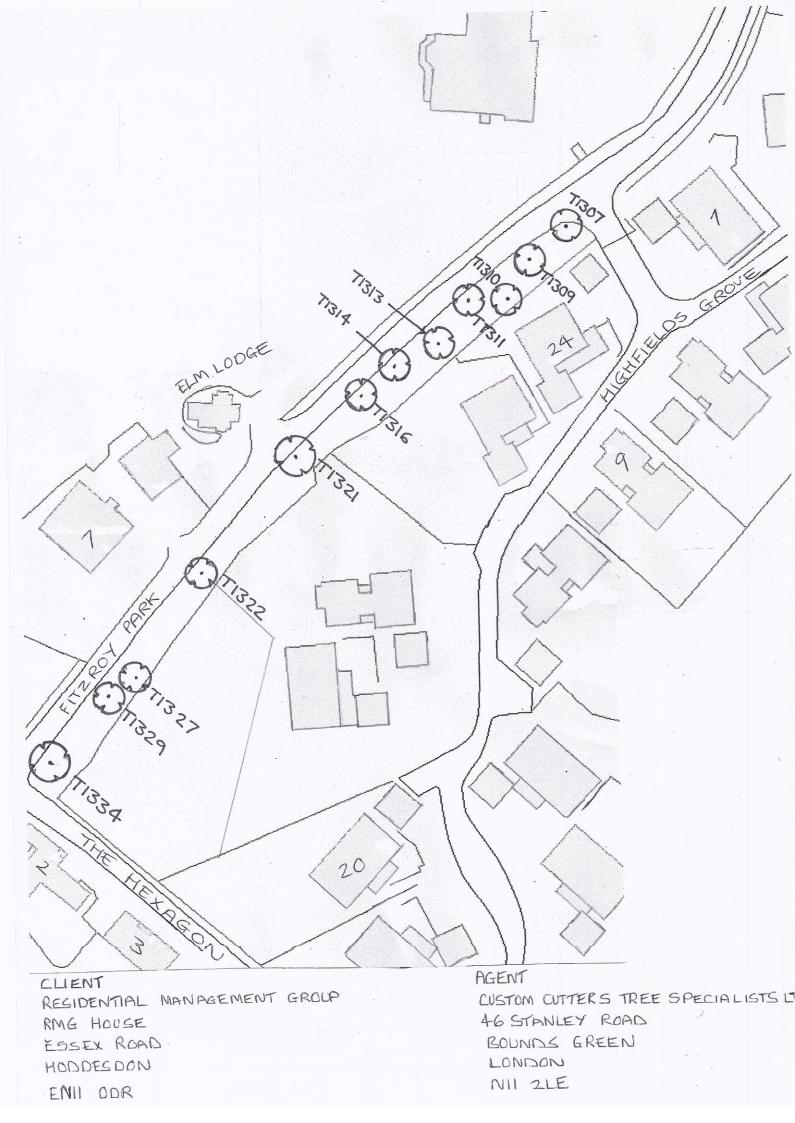

You must use this form if you are applying for work to trees protected by a tree preservation order (TPO). (You may also use it to give notice of works to trees in a conservation area).

It is important that you read the accompanying guidance notes before filling in the form. Without the correct information, your application / notice cannot proceed.

1. Applicant	Name and Address	2. Agent Name and Address

Reduce height by 10% Crown reduce spread by 15% Remove all deadwood from the crown.	Crown lift to a height of 5m from ground level. Remove all epicormic growth to a height of 5m from ground level. Crown reduce height by 10% Crown reduce spread to shape where necessary Thin throughout the crown by 15% Monitor the tree annually.	Reduce the entire tree down to a height of 9m from ground level. Carry out a climbing inspection. Monitor the tree throughout the summer of 2013	Crown reduce back to previous reduction points. Crown lift to a height of 5m from ground level. Reduce the main stems by 4m Monitor the tree annually.	Remove deadwood	Crown lift to a height of 5m from ground level. Remove hanging branch Remove all storm damage and deadwood.	Crown reduce height by 25%. Crown reduce spread to balance and shape the crown. Crown lift to a height of 6m from ground level. Remove all deadwood and basal growth.
This tree has some deadwood in the crown and is structurally sound at base.	This tree has some decay at a height of 0.5m from ground level to 2.5m from ground level to 2.5m from been caused by machinery/vehicle damage. The tree has recovered well with good callous growth and significant buttress roots. There is major deadwood in the crown.	This tree has previously been heavily crown reduced, approximately 6 years ago, when there was significant dieback in the crown. There is some dieback in the stems occurring where regenerative growth has not occurred. The tree requires management in order to abate further health and safety issues the tree coverhancing the road.	This tree has previously been crown reduced by 50%, approximately 6 years ago. The tree has a hollow trunk.	This tree is a good specimen. The tree is being suppressed by T1326	This tree has a sound union at a height of 3m from ground level. The tree has some deadwood and storm damage in the crown. There is also a handing branch in the crown.	This tree contains a significant piece of deadwood which is overhanging the road and should be removed. A limb in the upper crown has been damaged by the collapse of T1333.
