**Designed for IT applications**

## The GEA DENCO T-Range

Models in the T-Range are available in 5 versions, for cooling duties between 5 and 136 kW. They are provided with environmentally friendly refrigerants.

### Features of the GEA DENCO T-Range

The GEA DENCO close control units from the T-Range are compact and are available with various heat-rejection systems. Fully hermetic scroll compressors operate inside the units; they are also optionally available in twin version for energy-efficient VRF application. The air direction of the units can be either upflow or downflow. The models can be fitted with various supply air and return air configurations. An intelligent electronic system controls the units: it assures that precise tolerances are maintained for temperature and humidity, and it allows energy-saving operations. This close control system also allows the units to be networked together for master-slave operation, or as individual units. Data entry takes place via a matching soft-touch keypad, which is either mounted with the display on the close control unit, or is used as a remote control system. The heat exchangers are designed for maximum heat exchange area, minimum pressure drop, and quiet operation. The units in the T-Range are equipped with direct-drive fans, the fitting of EC fans is also possible as an option.

- The T-Range is ideal for application in server and computer rooms, telecommunications facilities, control and switching centres, laboratories, printing and graphics areas, sales zones, chip production, and high-tech offices
- Compact full-function units
- Fully modulating chilled-water operation
- Equipped as standard with high-quality, directly driven fans
- Air directions upflow or downflow
- Air-cooled, water-cooled, and split-system versions
- Optimised for environmentally friendly refrigerants
- Equipped as standard with fully hermetic scroll compressors (twin-compressor technology/VRF)
- Large number of standard options
- User-friendly, networkable control systems
- Complete front access for easy service and operation
- Units also available in weatherproof versions, with all functions (Box size 5 – 42)
- Large selection of matching accessories and options: e.g., electronic expansion valves, VRF technology and EC fans

### TW models: T-Range units in weatherproof version

The weatherproof models of the T-Range are installed in water- and dustproof enclosures with outer panels having a high-quality synthetic coating on a metal substrate. This solution means that they effectively resist the worst of storms and rain and can be easily installed on outside walls. The close control units of the TW models have cooling duties of 3 to 42 kW. The units are splashproof in accordance with IP54.

### Outdoor units

## The GEA DENCO DCRA and DDRA-Range

DDRA-Range with  
hydronic module;  
dry coolers from  
32 – 100 kW

The condensers in the DCRA-Range are available in ratings from 3 to 75 kW – and the dry coolers in the DDRA-Range from 32 to 100 kW.

The two ranges are absolutely identical when seen from the outside. They have the same dimensions, and are designed and manufactured for installation outdoors in accordance with quality standard ISO 9001:2008.

The condensers and dry coolers are equipped with directly driven, quiet-running axial fans with protection guards according to DIN 31001 and 24167.

Selection is possible in 3 sound power classes (6, 8, or 12-pole motors). The fans are statically and dynamically balanced with balancing quality Q 6.3. They are outstandingly suited for air-intake temperatures of -25 to +55 °C. The weather-protected and maintenance-free motors have an IP54 class of enclosure protection, and class F for insulating material. The frame, enclosure, and feet are made of aluzinc steel sheet.

#### Functions of the DCRA/DDRA-Range

- Emergency-off main switch
- Horizontal or vertical air routing
- Refrigerants R407C, R134a, and R410A or chilled water
- 3 sound power classes, with 6-pole motor as standard (8 or 12-pole motor as option)
- Blygold coating, optional

#### Accessories of the DDRA-Range

- Hydronic module (hydraulic kit), mounted on the common equipment frame
- Accessories of the hydronic module:
  - Expansion tank
  - Separate pumpset
  - Manual shut-off valve
  - Copper and steel fittings, or copper and brass
  - Soldered or threaded connections

#### Accessories of the DCRA-Range

- Temperature-controlled, separate speed regulation (not necessary for use with any GEA DENCO A-Type indoor unit)
- Winter start kit (down to -40 °C)
- Stacking kit

DCRA-Range: air-cooled condensers from 3 – 75 kW

C3-05 controller	Air conditioning controls
<b>C3-05 controls</b> <b>Display details and functions</b>  <p>The C3-05 controller is a compact unit featuring a central graphical liquid crystal display (LCD) surrounded by four programming keys: up, down, left, and right. The unit is labeled 'C3-05' at the bottom and has the GEA logo on the front panel.</p>	
<b>Graphical display</b> <ul style="list-style-type: none"> <li> <b>UNIT RUN</b> shown when unit fan(s) are running</li> <li> <b>COOL</b> shown when cooling demand is greater than 0 %</li> <li> <b>HEAT</b> shown when heating demand is greater than 0 %</li> <li> <b>HUMIDIFY</b> shown when humidification is greater than 0 %</li> <li> <b>DEHUMIDIFY</b> shown when dehumidification is greater than 0 %</li> </ul>	<b>Functions</b> <p>The C3-05 controller consists of a 32-byte microprocessor that operates the GEA DENCO application software that caters for all the requirements for close control air conditioning. The multi-functional C3-05 controller utilises 18 digital outputs, 6 analogue outputs, 18 digital inputs, and 9 analogue inputs to operate functions, such as:</p> <ul style="list-style-type: none"> <li>■ Variable-speed fan control</li> <li>■ Up to four stages of direct-expansion cooling</li> <li>■ Electronic expansion-valve control</li> <li>■ Energy-efficient freecooling system (AmBiCool)</li> <li>■ Dual cooling system (CombiCool)</li> <li>■ Chilled-water cooling</li> <li>■ Up to three stages of electric heating</li> <li>■ Low pressure hot water heating</li> <li>■ Reverse-cycle heat pump control complete with defrost control</li> </ul>
<b>Graphical display comprises:</b> <ul style="list-style-type: none"> <li>■ Unit ON/OFF key, providing "master" control of the local unit</li> <li>■ Graphical liquid crystal display, providing icon status of the unit functions, parameter menus, historic data logging, alarm buffer, and access to other controllers via the network system</li> <li>■ Four programming keys, providing access to display features</li> <li>■ Alarm key to view active alarms</li> </ul> <p>The 8 row LCD indicates unit function via the icons on rows 1 and 2. The remaining rows show the selected data, updated in real time. The programming keys (<b>↑ ↓ ← →</b>) have to be pressed in a coded sequence in order to enter or change the function currently being accessed. Current alarm status can be reviewed by using the <b>←</b> key to access the alarm buffer from the timeout display.</p>	<p>The C3-05 controller can interface with many of the most commonly used serial communication standards, such as:</p> <ul style="list-style-type: none"> <li>■ BACnet MS/TP</li> <li>■ BACnet IP</li> <li>■ Lonworks</li> <li>■ Modbus</li> <li>■ SNMP</li> <li>■ Webpage monitoring via Ethernet</li> </ul> <p>Please refer to the C3-05 controls operation &amp; maintenance manual for full details.</p>

# ADAPTIVE COOLING

L I M I T E D

Unit 1  
The Courtyard Business Centre  
Farmhouse Mews  
Thatcham  
Berkshire  
RG18 4NW

Tel: 01635 873485 Fax: 01635 873400

## Vertical and horizontal discharge

## GEA DENCO DDRA and DCRA-Range

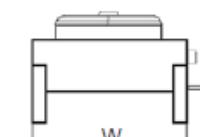

**DDRA and DCRA-Range**  
Discharge of dry coolers and air-cooled condensers

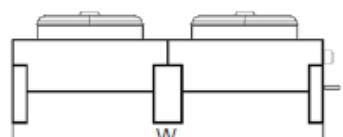

### Vertical discharge

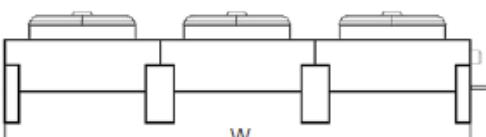

### Single fan

### Twin fan

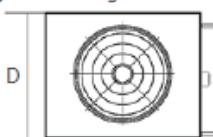

### Triple fan

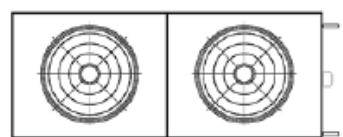

### Horizontal discharge

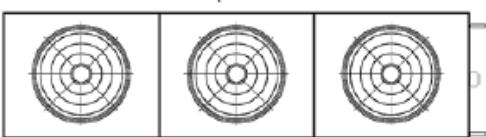

### Single fan

### Twin fan

### Triple fan

### Standard Version

6 Pole Model	Noise Level @ 3 m dB(A) / NR	Noise Level @ 5 m dB(A) / NR	Noise Level @ 10 m dB(A) / NR
DCRA 08 - 6	58 / 52	52 / 46	45 / 39
DCRA 13 - 6	60 / 54	54 / 48	47 / 41
DCRA 21 - 6	62 / 56	56 / 50	49 / 43
DCRA 26 - 6	63 / 57	57 / 51	50 / 44
DCRA 32 - 6	65 / 59	59 / 53	52 / 46
DCRA 50 - 6	66 / 60	60 / 54	53 / 47
DCRA 75 - 6	68 / 62	62 / 56	55 / 49

*Noise figures are typical sound pressure levels in an external environment.*
