Description of works:

New Shop Frontage: Installation of 8No. new external condensers to 7th floor roof level, 6No. new satellite dishes and 2No. new aerials.

Design principles and concepts applied to the proposal:

Installation of new plant in the landlord designated area for our client's tenancy, adjacent to existing installation.

Existing condensers on 7th floor roof level and area for proposed new condensers.

design statement

Design Issues:

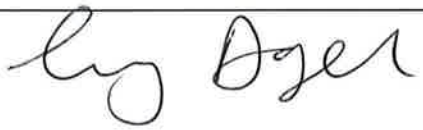

Low level external cooling units have been utilised to minimise visual impact and are more energy efficient. The satellite dishes which require a southerly orientation will be mounted onto the existing core which is set back 8m from the roof edge abutting Grays Inn Road and Coley Street.
