<b>Summary</b>	
<b>Description</b>	Evaluation undertaken by Portia Askew for Museum of London Archaeology Service, March 1997 - August 1998; site code SNH97. To the S of the site, an intrusive feature was exposed to a depth of c.1.5m below the top of the basement slab. The fill consisted of redeposited gravel and silt containing 20th century bricks and Roman pottery. This may be part of the Western Stream which was scoured out and backfilled during the construction of Sudbury House in the 1960s. Periods recorded under this site code: Roman (084996-7), undated (084998).

<b>Summary Description</b>	DOCUMENTARY & CARTOGRAPHIC INFORMATION REVEALED THAT THE CONDUIT WATER SYSTEM FOR THE GREYFRIARS COMPLEX WAS GRANTED BY ROYAL & CIVIC PATRONAGE C 1250 & WAS REGULARLY MAINTAINED AFTERWARDS UNTIL IT FELL INTO DISUSE C 1739. THE EYSTEM RAN ALONG NEWGATE ST, SNOW HILL, UP HOLBORN TO LEATHER LANE & ORIGINATING IN CHAPEL ST. A LATER EXTENSION WAS DISCOVERED BY P NORMAN IN THE GARDEN OF 20 QUEENS SQ IN 1893. AN ARCHED PASSAGE LED TO A BARREL VAULT DEMOLISHED C1911. THE FOUNDATIONS OF A RAG BUILDING WERE NOTED ABOVE THE TANK. THE ORIGINAL CONDUIT HOUSE (WHITE CONDUIT) WAS NOTED AT THE REAR OF 13 CHAPEL ST, CONSISTING OF A CHAMBER WITH A SETTLING TANK AT ONE CORNER. THE GREYFRIARS PLAT SHOWS A NUMBER OF "CESPERILS" OR INSPECTION CHAMBERS. THE PLAN SHOWS THE CONDUIT YARD TO BE IN THE WESTERN PART OF THE PRECINCT WHERE NORMAN & READER FOUND AN OVERGROWN RAG DRAIN/CHANNEL C3 FT (0.91M) WIDE & > 1 FT (0.3M) DEEP.

<b>Summary</b>	Temple Bar
<b>Description</b>	TEMPLE BAR MARKED THE WESTERN BOUNDARY OF THE CITY LIBERTIES. IT WAS 1ST MENTIONED IN 1293. ORIGINALLY COMPOSED ONLY OF POSTS, RAILS & A CHAIN, A GATEWAY WAS LATER ERECTED (POSSIBLY BY 1351 WHEN A PRISON IS MENTIONED AS PART OF THE STRUCTURE). THIS GATEWAY WAS OF WOOD & SURVIVED THE GREAT FIRE BUT WAS REBUILT BY WREN IN PORTLAND STONE IN THE EARLY 1670s. WRENS BUILDING CONSISTED OF A CENTRAL ARCH FOR CARRIAGES FLANKED BY 2 FOOT POSTERNS. THIS WAS REMOVED IN 1878 FOR OBSTRUCTING TRAFFIC & LATER RE-ERECTED IN THEOBALDS PARK, CHESHUNT. DURING ITS REMOVAL THE REMAINS OF A FLUE & A CIRCULAR STAIRCASE (LEADING TO THE ROOMS ABOVE THE BAR) WERE FOUND IN A RECESS 3FT (0.91M) WIDE BEHIND THE S BUTTRESS. HILTON-PRICE INTERPRETS THIS AS DEMONSTRATING THAT THE BAR ORIGINALLY ACCOMMODATED A CUSTODIAN.

<b>Summary</b>	
<b>Description</b>	Watching brief by K. Tyler for Museum of London Archaeology Service, July-Oct 1994; site code QNS 94. The only feature found was a 18th century cesspit, though there were traces of post-med dump layers over truncated natural gravel. However the watching brief conditions were not ideal, and the report states that these results should not be taken as representative of other sites in the area.

<b>Name</b>	1-2 St John's Path, Clerkenwell
<b>Map Sheet</b>	TQ38SW
<b>Grid References</b>	Centre Point: TQ 31640 82040 (point) (Centred on)
<b>Summary Description</b>	Along the southern and western walls of 2 St John's Path lay a trench built foundation, that overlay the dump level. It cut the dump deposit, running underneath the surviving wall at a slight angle to it. It was composed of rough courses of rough greens sandstone blocks, some of which appear sawn and therefore probably re-used. The backfill contained CBM and degraded wood although whether this relates to the destruction of the former building is as yet untenable.

<b>Summary Description</b>	On top of the dump and the foundation trench lay the 19th century wall, surviving. It seems to have used the older wall as a foundation to build upon and instead was constructed from red brick in English cross courses. The trench for this wall cut through a dump as well and much of the pottery reflected a late 18th to 19th century date, including teapot in pearlware and sherds of delftware.

<b>Summary</b>	
<b>Description</b>	Trench 3 produced remains of a flue structure made from dark red asymmetrical bricks. It was constructed in a cut filled with compact orange sand. The inside of the structure had a 10mm thick mortar render. Modern pitting and construction of the present pathway had heavily truncated the structure. This mortar was heavily scorched on one side indicating that hot gas/liquids had passed down it.

<b>Summary</b>	
<b>Description</b>	The lowest deposit of watching brief trench 1 revealed a greyish brown clayey silt dump. It contained CBM, seafodd remains and fragments of the same green sandstone building material as used in the construction of the later foundation. Pottery is dated from the mid to late 17th century, mainly from Surrey-Hampshire border whiteware with clear gaze.

<b>Summary Description</b>	GODFREYS INTERPRETATION OF THE SITE OF THE NEW TEMPLE HAS THIS SITE AS THE POSITION OF THE LAY BROTHERS HALL. AFTER THE SUPPRESSION OF THE TEMPLARS THIS BECAME THE HALL OF THE MIDDLE TEMPLE. IT WAS DESCRIBED AS A STONE BUILDING OF EXCEPTIONAL STRENGTH WITH SIMILAR ARCHITECTURE TO THE ROUND CHURCH (SEE 04188901). AFTER THE CONSTRUCTION OF A NEW HALL FOR THE MIDDLE TEMPLE IN 1562 (SEE 20073302) IT WAS CONVERTED INTO CHAMBERS & WAS FINALLY DEMOLISHED IN 1638. ITS FOUNDATIONS WERE REVEALED IN 1735 BUT WERE NOT RECORDED.

<b>Summary</b>	
<b>Description</b>	Watching brief undertaken by D. Lakin for Museum of London Archaeology Service, May-September 1998; site code BNT98. Dumped deposits containing pottery dating to between 1270-1500 were seen in one test pit. Otherwise no material which can be dated to the lifetime of the Priory was observed. No features were seen which might represent tenements or other structures in the outer precinct. Periods recorded under this site code: medieval (084580), post-medieval (084581-2).

<b>Map Sheet</b>	TQ38SW
<b>Grid References</b>	Centre Point: Centroid TQ 3177 8160 (MBR: 10m by 10m) (Approximate)
<b>Summary Description</b>	Two test pits were excavated on 15 and 16 Dec 1997 and two further test pits from 7 to 16 Jan 1998. Seventeen geotechnical test pits and three test pits were observed between March and April 1998. An open area (1) excavation was undertaken from 15 Feb to 26 March 1999. A second area excavation was undertaken from 24 March to 15 April 1999. Two test pits were investigated in area 3 between 28 March and 16 April 1999. A watching brief was carried out within area 3 between 26 Jan and 11 Feb 2000. Limited Roman occupation, in the form of pits, a well and occasional fragments of pottery, were found. All of the pottery dated from the 1st-2nd centuries AD and the forms suggest a domestic rather than a ritual activity on the site.

<b>Summary</b>	
<b>Description</b>	In the fourteenth century the first activity appears to have been quarrying to extract gravel from the site. These pits were recorded in areas 1 and 2 and appear to have been excavated systematically and backfilled rapidly with a relatively sterile topsoil. During the 14-15th centuries at least one building was constructed consisting of chalk foundations and fragments of a tile floor. An oven was also incorporated into the building. Another large hearth and oven were built outside of the building.

<b>Summary</b>	
<b>Description</b>	The eastern side of the site revealed a large brick lined cess pit probably in use in the 18th century and backfilled during the late 18th/early 19th century. The structure itself includes two brick bases possibly for supporting a vaulted roof. It is almost 4m deep and may have served an industrial purpose. There are no associated finds.

<b>Map Sheet</b>	TQ38SW
<b>Grid References</b>	Centre Point: Centroid TQ 3125 8124 (MBR: 10m by 10m)
<b>Summary Description</b>	EXCAVATIONS BY J SIEGEL FOR THE Department of Greater London Archaeology, MUSEUM OF LONDON 1976 REVEALED EVIDENCE OF PRE 1663 LAND USE PREDATING CLIFFORDS INN CHAMBERS 14-17. PREDATING THE BUILDINGS WERE PITS, DITCHES AND GARDEN SOIL DATING TO THE 16TH AND 17TH CENTURIES, WHICH CONFIRMS THE CARTOGRAPHIC EVIDENCE THAT THE AREA WAS NOT BUILT OVER UNTIL THE LATER 17TH CENTURY.

<b>Summary</b>	
<b>Description</b>	Archaeological examination by A. Westman for Department of Urban Archaeology, Dec. 1987; site code WOC87. A cellar adjoining The Old Cheshire Cheese public house, Wine Office Court, was examined. The brick cellar, made with cast iron columns of early 19th century type supporting iron ceiling beams and shallow brick ceiling vaults, was added to the E of existing 18th century cellars and a standing building, now occupied by the public house. Original entrances to the cellar were from the W and S; the latter, possibly leading to the ground floor, was later blocked and another doorway was inserted in the N wall, giving access to further cellars. No further periods recorded under same site code, but see entry 200678 for details of The Old Cheshire Cheese.

<b>Summary Description</b>	Excavation by K. Steedman for the Department of Urban Archaeology, March-Dec 1985; site code QVS 85. Reclamation of the foreshore took place from the late C13 or early C14, with several phases of dumping evident. There was evidence of tranple surfaces dating to c.C15. The early dumping may have been contemporary with the construction of the associated revetment wall (042894 01). Periods recorded under same site code: medieval (042894-5); post-med (042896-9).

<b>Summary Description</b>	Excavation by K. Steedman for the Department of Urban Archaeology, March-Dec 1985; site code QVS 85. A ragstone wall dated to the late C13/early C14 served as a revetment for land reclamation of the foreshore (042894), and may also have had a defensive function. Its construction may have been contemporary with the earlier reclamation deposits. Periods recorded under same site code: medieval (042894-5); post-med (042896-9).

<b>Map Sheet</b>	TQ38SW
<b>Grid References</b>	Centre Point: Centroid TQ 3171 8196 (MBR: 10m by 10m)
<b>Summary Description</b>	Excavation by I. Grainger for Museum of London Archaeology Service, April-July 1994; site code ABP 94 (following earlier excavations on part of the site under site code JAN 90). Numerous quarry pits were dated to AD 1150-1350, indicating that the quarrying was contemporary with St John's Priory and suggesting that they were associated with building work in its precincts. Their distribution and size suggested the presence of a boundary, though no physical evidence of it survived.

<b>Summary Description</b>	Excavation by I. Grainger for Museum of London Archaeology Service, April-July 1994; site code ABP 94 (following earlier excavations on part of the site under site code JAN 90). A number of refuse and/or cess pits were dated to AD 1150-1350 and AD 1230-1350, contemporary with the use of St. John's Priory. One large feature may have been a quarry pit subsequently used for rubbish disposal. Periods recorded under same site code: Roman (082721-3); medieval (082724-7); late med/early post med (082728-31); post-med (082732-3, 082302, 082299, 082299 01-3).

<b>Summary</b>	
<b>Description</b>	Watching brief undertaken by Adrian Miles for Museum of London Archaeology Service, April'97; site code DLL97. At the N end of the site, the trial pits showed a much deeper level of activity, which represent pitting or quarrying. Periods recorded under this site code: medieval (083806-7).

<b>Summary</b>	
<b>Description</b>	Watching brief undertaken by David Sankey for Museum of London Archaeology Service, June 1998; site code ADS98. A truncated brick feature, probably a well, was partly revealed by a trial pit. It contained late 18th century or early 19th century finds. No further periods recorded under this site code.

<b>Summary</b>	
<b>Description</b>	Excavation undertaken by P Durnford for Department of Urban Archaeology; site code FRD86. The presence of typical waterfront dumps and possible revetment features were found, suggesting that the river Fleet may originally have run more to the E. Periods recorded under same site code: medieval (043035-6), post-medieval (043037)
