Summary	
Description	Excavation undertaken by A Bayliss for the Department of Urban Archaeology, March-June'88; site code OBA88. Several kilns were constructed on the site, although the structure of only one of them survived. No wasters were recovered, although the character of the kiln suggests that it had been used for the manufacture of fine pottery. Demolition debris suggests that there had been at least 6 other such features. Periods recorded under same site code: Roman (043785-9), Saxon/medieval (043790), medieval (043791)

Summary	
Description	Excavation undertaken by A Bayliss for the Department of Urban Archaeology, March-June'88; site code OBA88. A large octagonal building, 16m in diameter, replaced the kilns on the site (SMR ref: 043786). This was associated with large scale terracing. This building was probably surrounded by an ambulatory 3.75m wide. The whole building would then have enclosed an area of 520m square. It had been completely robbed out, but red-painted wall plaster, ragstone and opus signinum probably featured in its construction. It was tentatively interpreted as a Romano-Celtic temple. Periods recorded under same site code: Roman (043785-9), Saxon/medieval (043790), medieval (043791)

Summary	
Description	Excavation undertaken by A Bayliss for the Department of Urban Archaeology, March-June'88; site code OBA88. A large masonry building followed the robbing out of the temple (SMR ref: 043787). This new building had at least 9 rooms. It was rebuilt at least once, and at a later date a hypocaust was added. A coin of 335-341 dates the demolition and robbing of the building to the mid C4th or later; its function is unknown. Periods recorded under same site code: Roman (043785-9), Saxon/medieval (043790), medieval (043791)

Summary	
Description	Watching brief undertaken by David Divers for PCA, June 1997; site code BGL97. Medieval deposits probably represented the remains of an agricultural or horticultural soil possibly from within the grounds of a medieval nunnery that occupied part of the site. No archaeological features were attributed to this period. Periods recorded under this site code: medieval (084631), post-medieval (084632-3).

Name	21 Bowling Green Lane
Map Sheet	TQ38SW
Grid References	Centre Point: TQ 31230 82200 (point)
Summary	
Description	Eight test pits were inspected by Norton Thompson Associates. One of them exposed a series of at least two earlier brick surfaces at the rear of the site that are thought to link up with the courtyard that gave access to Bowling Green Lane itself. Other features were present but were somewhat ephemeral and it is not know how much the natural has been truncated.

Summary Description	Although there is some evidence for activity on the site in the early medieval/late Saxon period, the principal feature to survive at Hosier Lane was the east-west drainage ditch, which presumably ran into the former Fleet river to the west. The ditch was used subsequently for the disposal of animal waste and domestic refuse; the lack of fish bone suggests that it was not used for the deposition of cess. Pottery dating from the use and subsequent backfilling of the ditch fell mainly into a range between 1150 and 1350, although it may have been dug in the 11th, or more likely, 12th century. A number of later channels or sumps truncated the backfill of the ditch; these also date to the middle of the 14th century.

Summary	
Description	A barrel well was recorded to the south of the ditch in Area A2, truncating the backfill (dating from 1150- 1350) of a major east-west drainage ditch. The lifespan of the well appears to have been fairly short; backfill within the timber barrels dated to the end of the 14th century.

Summary	
Description	Although the dating is inconclusive, a segment of chalk wall was recorded running east-west across the site, truncating the topmost reclamation deposits over the Saxon/ Medieval ditch. It is possible that this wall related to a late Medieval phase of development on the site. Fragments of an east-west brick and chalk wall, dating to the late 15th century, was recorded on the site. Much of the post-medieval phase of the site, however, appears to have been largely truncated by modern activity.

Summary Description	TWININGS WERE AN OLD ESTABLISHED TEA & COFFEE MERCHANTS FOR NEARLY 200 YEARS WHEN IN 1824 THEY DECIDED TO ADD BANKING TO THEIR BUSINESS. THE BANK WHICH WAS ORIGINALLY DESIGNED FOR USE SOLELY BY THE TWINING FAMILY & THEIR CONNECTIONS WAS SITUATED IN A SMALL ROOM ADJOINING THEIR WAREHOUSE. WITHIN A FEW YEARS THE BUILDING NEXT DOOR (NO 215) WAS ACQUIRED FOR USE AS A BANK WITH A DOOR CONNECTING THE WAREHOUSE AND BANK. IN 1892 THE BANK OF TWINING & CO WAS AMALGAMATED WITH LLOYDS BANK. THE BANK CONTINUED TRADING AT NO 215 UNTIL 1895 WHEN IT BECAME PART OF LLOYDS BANK AT NO 222-5, THE STRAND. (SEE GLHER 207564).

Summary	
Description	Watching brief by A. Thompson for Department of Urban Archaeology, c. 1979; site code FRR79. A probable east embankment of the River Fleet was revealed (043663), and was associated on its E side with a ditch-like feature of which a width of c. 5m was examined. This feature was probably man-made, although the limited evidence from the section may point to a natural linear feature connected with the river; only work on the environmental samples will verify this. Periods recorded under same site code: unknown (043663-4).

Summary Description	I Noel Hume for Guildhall Museum , 1955; site code: GM169. A brick-walled late 17th century cellar had been turned into a domestic refuse pit c 1720-30, and then filled with rubble to street level. It lay in the SE area of the site directly against the walls of the railway viaduct. Deflt, stoneware, pipes and coarse pottery were found in the fill. Cesspit also found (044368). No further periods recorded under this site code.

Summary Description	EXCAVATION BY B LANGTON FOR THE Department of Urban Archaeology (MAY-JUNE & SEPT-DEC 89, SITE CODE WES 89) REVEALED A SERIES OF AT LEAST 127 BURIALS FORMING PART OF AN EXTENSIVE LATE ROMAN CEMETARY. THESE BURIALS, INCLUDING 14 CHALK BURIALS WERE ORIENTATED VARIOUSLY, BUT GENERALLY N-S OR W-E. 1 OF THE BURIALS, OF A CHILD, CONTAINED 10 BRACELETS OF SHALE, COPPER & BONE AS WELL AS A SILVER EARRING & AN INTACT NENE VALLEY WARE COLOUR COATED BEAKER. A JET NECKLACE OF MORE THAN 220 BEADS IN SEGMENTED, FACETED & OTHER SHAPES WAS FOUND WITH ANOTHER BURIAL. 2 BURIALS WERE ACCOMPANIED DY DECORATED BONE COMBS, 1 OF WHICH WAS OF A RARE FORM: A DOUBLE SIDED COMB MADE OF COMPOSITE MATERIALS DATED TO THE C4. A COPPER ALLOY RING WAS FOUND ON THE FINGER OF 1 SKELETON & ANOTHER BODY WAS BURIEDWITH A WOODEN BOX CONTAINING JEWELLERY & COSMETIC EQUIPMENT. THE DENSITY OFTHE BURIALS WAS VARIABLY LOCALISED, SOME PHASES OF GRAVES COINCIDING WITH PITTING & RUBBISH DISPOSAL (SEE 042729). 1 SMALL AREA REMAINED FREE OF BOTH GRAVES & PITS.

Summary Description	Excavation by Chris Thomas for the Department of Greater London Archaeology, July'91; sitecode CIN 91. Several phases of medieval dumping were recorded. The first consisted of redeposited brickearth which was cut by a quarry pit (SMR ref: 082380). Later medieval dumping appears to have been to level the ground. Periods recorded under this site code: Roman (083668), medieval (082379, 083666-7), post-medieval (082380). For other archaeological work on this site see SMR refs: 082311-2.

Summary Description	Excavation undertaken by Chris Thomas for the Department of Greater London Archaeology, July'91; sitecode CIN91. A shallow E-W gully was recorded which contained medieval pottery. Its function was unclear, but whilst it was certainly not at its full depth, it was thought most likely to have been for drainage. Periods recorded under this site code: Roman (083668), medieval (082379, 083666-7), post-medieval (082380). See also SMR refs: 082311-2 for further archaeological work on this site.

Summary	
Description	Watching brief by B. Watson for Museum of London Archaeology Service, October 1993; site code GRI 93. The site lies within the documented extent of St Andrew's Holborn detached burial ground (1754-1853 - see 201958 and components for that part of former burial ground now open as public gardens). All burials within the upper portion of the site had been exhumed, probably between 1871-1896, but deeper burials were still in situ. A number of gravestones were also recorded. See also 082628 01 - brick vault. A subsequent watching brief undertaken by Gordon Milne (Consultant Archaeologist, Nov'96; site code GSI96) recorded a further post-medieval burial and several broken, uninscribed tombstones. PERIODS RECORDED UNDER SAME SITE CODE: post-med (082628).

Summary Description	Watching brief undertaken by Gwilym Williams for OAU, July-August'97; site code LIF97. Post-medieval deposits were observed in engineer's test pits. These were thought to be either garden soils associated with 18th century development fronting Lincoln's Inn Fields or pit fills, although the excavator thought the former to be the more likely. No further periods recorded under this site code.

Summary Description	AN ARCHAEOLOGICAL EVALUATION WAS CARRIED OUT BY THE Department of Greater London Archaeology IN OCT/NOV 1991 (SITECODE ALO91). BASEMENTS HAD CAUSED EXTENSIVE TRUNCATION TO ALL BUT MAJOR CUT FEATURES. THE TRUNCATED BASE OF A PIT OR WELL WAS FOUND.(15.66M OD INTO NATURAL GRAVELS). THE FEATURE HAD BEEN BACKFILLED, INCORPORATING BURNT DAUB, CHARCOAL, MIDDLE SAXON POT AND A ROUND HEADED COPPER ALLOY PIN. SAXON OCCUPATION(?) TOGETHER WITH A WATCHING BRIEF BY MOL AT WILD ST (MLO58033, SITECODE WID 91) SUGGESTS THAT THE SETTLEMENT AREA MAY EXTEND FURTHER EAST THAN HAD BEEN THOUGHT.

Map Sheet	TQ38SW
Grid References	Centre Point: Centroid TQ 31730 81536 (MBR: 1m by 1m) (Centred on)
Summary Description	In the base of test pit 1, a 0.14m thick deposit of loose, dark brown, silty sand sealed the fills of several features cut into disturbed natural sand. This layer contained frequent inclusions of charcoal flecks and moderate amounts of pot, mortar, bone and cremated bone fragments. A moderate amount of flinty gravel was also present. The layer was very similar in nature to the fills of the underlying features and may be the interface between the fills and the succeeding layer of made ground composed of loose, brown silty sand. The made ground also contained fragments of pottery, mortar, animal bone and cremated bone. The pottery recovered from these layers were dated to the second century and was retrieved in sufficient quantity to date the layers to the Roman period (as opposed to being residual). No features were directly associated with the finds, however further excavation of the deposits showed that they may be disturbed.

Summary Description	A 0.25m thick layer of disturbed, light brownish yellow sands sealed the natural in testpit 1 and this layer contained mottles of brown silt. A range of sub-circular to rectangular cuts truncated the 'dirty' sands and were recorded in plan only. A number of the fills contained charcoal, burnt bone and CRM flecks, one of the features was possibly the base of a post hole or cremation pit.

Summary	
Description	A 1.3m length of chalk and mortar wall foundation was present in the east side of Test pit 3. No cut was evident for the wall. The wall would have continued to the north and coincides with observations made in 1991. Underpinning of the east wall truncated the foundations in the area of the former 1991 trial pit. The foundations appear to be in situ rather than reused blocks for the current wall foundation. The foundations continue to the south at an angle slightly off north-south. The height of the foundations were present at c. 11.22m OD.

Summary Description	Test pit 2 revealed 19th century deposits associated with the levelling up of the site prior to placement of the basement slab. Below the basement slab of 35 Cock lane two roughly rectangular rubble pits were recorded in the north-west and south-west corners of Test pit 3. Brick and mortar fragments in the fills date the pits to at least the mid- 19th century. The pit seen in section on the north side of Test pit 3 is the same as previously recorded in 1991.
