Summary Description	SITE OF THE 17th century MANSION OF THE EARLS OF AYLESBURY WITHIN THE PRECINCT OF ST JOHNS PRIORY. EXCAVATION BY Department of Greater London Archaeology 1989 (SITE CODE SJJ89) RECORDED FLOORSURFACES OF TILE, CLAY & BRICK ALONG WITH THE REMAINS OF JOISTS FROM A WOODEN PLATFORM. A GATEWAY WAS FOUND WITH A GRAVELLED YARD SURFACE OUTSIDE WITH WHEEL RUTS IN IT LEADING TO THE GATEWAY. THE MANSION RE-USED MANY EARLIER MEDIEVAL WALLS FROM THE PRIORY (SEE 080436).

Summary Description	A watching brief by D Lakin for Museum of London Archaeology Service in November 1993 (site code BSI93). A Medieval and Post Medieval garden soil build up was found, cut by insertion of 16th century garden wall of Berkeley House (SMR 082299) to east. The wall was rebuilt before C.1700, present building erected c.1719. See also SMR 082554-555.

Summary Description	REFURBISHMENT OF STANDING BUILDINGS IN 1986 GAVE THE OPPORTUNITY TO ASSESS THE ARCHAEOLOGICAL POTENTIAL NEAR THE SITE OF ST JOHNS PRIORY, & ALSO TO RECORD ANY WALLS ASSOCIATED WITH IT. TRIAL TRENCHING BY THE Department of Greater London Archaeology TO A MAXIMUM OF 0.8 M BELOW THE MODERN BASEMENT FLOORS SHOWED NO MEDIEVAL SURFACES SURVIVING WITHIN THE BUILDING. MOST FLOORS OVERLAY NATURAL SANDS & GRAVELS, BUT IN THREE OF THE BASEMENT ROOMS, THE FLOOR SEALED TRUNCATED CHALK FEATURES OF UNKNOWN FUNCTION. SALT GLAZED STONEWARE FROM THE CONSTRUCTION CUT OF ONE CHALK FEATURE SUGGESTED POST REFORMATION DATE.

Summary Description	INSPECTION BY Department of Greater London Archaeology 1986 DURING REFURBISHMENT RECORDED PLAN & ELEVATION OF CHALK & RAGSTONE WALLS THOUGHT TO BE REMAINS OF ST JOHNS PRIORY, IN PLACE SURVIVING TO 2.10M ABOVE THE LEVEL OF MODERN BASEMENT FLOORS, INCORPORATED INTO WALLS OF LATER LISTED BUILDING (SEE 212766). ARCHITECTURAL FEATURES OBSERVED INCLUDED AN ARCHED DOORWAY WITH CHAMFERED JAMBS & A PARTIALLY BLOCKED RECESSED WINDOW & A WALL WITH SOME CHEQUERBOARD DECORATION. TWO CAENSTONE BLOCKS USED AS INFILL IN ONE WALL SUGGESTED ITS CONSTRUCTION POST-DATED DEMOLITION SEEN ELSEWHERE IN THE PRIORY (POSSIBLY DURING THE PEASANTS REVOLT OF 1381).

Summary Description	THE PRESENCE OF CLERKENWELL PRIORY GATE IS INDICATED BY A NARROWING OF THE ROAD AT THIS POINT. AN ILAU EXCAVATION AT 54 & 55 CLERKENWELL CLOSE RECORDED LARGE MEDIEVAL STONE WALLS (08043716001 - 004) THAT ARE POSSIBLY ASSOCIATED. THE POSITION OF THE GATEWAY HAS BEEN TAKEN FROM THE Department of Greater London Archaeology MAP WHICH SHOWS THE LOCATION QUITE ACCURATELY. Watching brief by B. Sloane for Museum of London Archaeology Service, Oct 1994, site code CLC 94, recorded medieval masonry walls in the basement of No 54 Clerkenwell Close. Some of these are likely to be the part of the gatehouse of the nunnery. See also site code ENG 84 for work on adjacent sites.

Summary	
Description	Several wall foundations were recorded above probable 17th c features. The foundations were constructed with whole and broken unfrogged red/ purple bricks and cobbles; bonded with pale yellow- white sandy lime mortar. The bricks date to the 18th- early 19th century, presumably representing redevelopment of the site at this time. Further redevelopment of the site is evident in the later 19th century, as represented by several wall foundations built onto the earlier ones.

Summary	
Description	Watching brief undertaken by AT MacKinder for the Department of Urban Archaeology, Feb'88; site code LLA88. Refurbishment of a 19th century building revealed a subdivided chalk and brick cellar backfilled in the late 18th century. The backfill included human bones, perhaps derived from disturbance of burials originally associated with the nearby church of St Bartholomew the Great (SMR ref: 041240). No further periods recorded under this site code.

Summary Description	Evaluation undertaken by Charles Harward for Museum of London Archaeology Service, September - October 2000; site code: KIY00. Several disarticulated human bones were found within the backfill of a 18th century or 19th century cellar (SMR ref. 084974). It is thought that these did not originate from the site and were redeposited within the backfill. Periods recorded under this site code: post-medieval (084972-5).

Summary	
Description	Evaluation undertaken by K Pitt for Museum of London Archaeology Service, August to September 1996; site code: KWH96. Stakeholes, postholes and beamslots were recovered. These features represent the truncated remains of structures and possibly buildings, but no dating evidence was recovered from the fills of these structural features. They may represent more than one phase of activity. Periods recorded under this site code; Iron Age (083634), Saxon (083635-6), and Medieval (083637).

Summary	
Description	Watching brief by B. Pye for Department of Urban Archaeology, Feb. 1984; site code DEL84. Timber platform structures, probably of mediaeval date, were found on top of natural. Their purpose is uncertain, but they could represent terracing of the Fleet Valley. They were overlain by dumped material dated to 1100-1150 AD (see 043179). Periods recorded under same site code: mediaeval (043179-80), med/post-med (043181-3), post-med/medieval (043184-7), unknown (043188-9).

Summary Description	Watching brief by B. Pye for Department of Urban Archaeology, Feb. 1984; site code DEL84. Dumped deposits of either a mediaeval or a post-mediaeval date were found at both the W and the E end of the site. At the W end, they were truncated by a basement and a cess-pit (043182 & 083183 respectively), whilst at the E end they lay above and beneath chalk foundations (043188). Periods recorded under same site code: mediaeval (043179-80), med/post-med (043181-3), post-mediaeval (043184-7), unknown (043188-9).

Name	6-9 BRISET ST
Map Sheet	TQ38SW
Grid References	Centre Point: Centroid TQ 3168 8201 (MBR: 10m by 10m)
Summary	
Description	Excavation by Department of Greater London Archaeology, 1990; site code BAD90. A deep ditch aligned N-S was recorded. This was 1.5-2.3m wide and 1.4m deep and was possibly a storm drain related to St. John's Priory. Evidence of demolition activity within the life of the priory was also recorded. See 082304-5 for other finds from the site.

Summary Description	Evaluation by Museum of London Archaeology Service in 1999 of an east-west wall faced with ragstone interpreted as the remains of the south wall of a building which was located just outside the inner precinct of the Priory of the Knights of St John of Jerusalem and suggested that it was built not long after the foundation of the priory in 1144. Part of the internal brickearth floor survived.

Summary	
Description	P Marsden for Guildhall Museum , 1965; site code: GM128. Piling operations on the site disclosed black silt along the E side on the Warwick Lane frontage, and the foreman reported that black silt was found in the SW corner. The former deposit must have been part of the W arm of the stream discovered on the site of Paternoster Square to the E in 1961. No further periods are recorded under this site code.

Summary	
Description	Evaluation undertaken by Julian Hill for Museum of London Archaeology Service, February - March 2000; site code OLI00. Post-medieval brick walls and a York stone floor were recorded. These appear to be structures associated with a ventilation 'duct' associated with 19th century Sessions House. Periods recorded under this site code: Roman (085130), post-medieval (085131).

Summary	
Description	An archaeological evaluation carried out by Portia Askew on behalf of Museum of London Archaeology Service. In test pit 3, a 1.20m deep layer of homogenous dark brown-green sandy clayey silt was located. This was assigned to the post-medieval period, although it is not clear if it represents a ditch fill or a levelling dump indicating the final infilling of the ditch. No finds were recovered from the deposit. Post-medieval foundations were identified on the site, which may relate to the previous 1834 Central Criminal Court buildings on the site.

Summary	
Description	Excavation of trench 1 exposed natural gravel at 10.25m OD overlain by made ground up to 0.80m thick. A stub of a wall was found the structure consisting of a length of curved brick wall, roughly built with no discernable bond using unfrosted red bricks. Associated with the wall was a ceramic pipe, actually leading into the wall from the north-east and is probably a soakaway or possibly a former well. Two footings were also installed within the structure one above the pipe and another running parallel to the west of the pipe. Demolition material relating to the demolition of these structures in the 19th/20th centuries were observed as well.

Grid References	Centre Point: Centroid TQ 3158 8132 (MBR: 10m by 10m)
Summary Description	Excavation undertaken by A Miles for Museum of London Archaeology Service, June-July'91/Nov'91-Feb'92; site code FAO90. In 1610 a burial ground was established on the site, yielding 606 burials dating to between 1770-1849. Most of the burials were in wooden (elm) coffins, stacked up to 8 deep, which in turn formed 9 intercutting N-S rows across the site, in at least 2 phases. At the W end of the site, a brick burial vault, truncating the earlier cellared building (SMR ref: 044026) contained 47 burials in coffins and a further 75 individuals that had been pushed up to the far end of the vault to create space. Periods recorded under same site code: medieval [GLHER: 044024-5], post-medieval [GLHER: 044026-8]. (1) **This is the same site as GLHER record 221158**
