16th October 2012

Dear Alan,

Further to our meeting on 25th of May 2012 to inspect the external façade mock up on site and subsequent correspondence, please find enclosed photos of the external façade mock up, completed sections of the building elevations and various individual material and finishes samples proposed to be installed at R5 North, to fully discharge Condition 2a of Reserved matters Approval (ref 2011/0431/P) for R5 North. A full list of the enclosures is attached to the application form.

On the 25th we presented to you our proposal to revert to a single bar window balustrade, rather than a zig zag bars on the façade Type 1. Please find enclosed scaled drawings for substitution of the North and West block building elevations (Drawings AA0716C(20)E01 to E09 inclusive)

On the 27th of July we wrote to you to advise that in response to the comments made at the committee meeting for the R5 North Reserved Matters application last year we have revisited the R5 north block entrance gate design and finish to the surrounding pre-cast and in-situ columns that frame it. Please find enclosed a scaled drawing of the north elevation of the North block showing the revised metal gate / screen design. Steel section sizes and colours are shown on this drawing. A further attachment illustrates these colours.

Additionally since the approval of R5 North, the material of the R5 North and West block cantilever balconies has been subject to design development. The base of the balconies is now proposed to be Powder coated metal instead of pre-cast concrete to be consistent in material and finish with the metal canopy colonnade surrounding the courtyard. Please find enclosed a photo of balconies and the finish colour (RAL 8019).

The relevant application form for approval of details and a cheque for £85 are also enclosed with this letter.

I trust that you find this application to be in order but please contact me should you have any queries.

Yours sincerely,

Tony Kitchen
