## Assessment

External alterations include- replacement of window and door in closet wing by 2 new windows, installation of new french doors to rear elevation, installation of security gates to front entrance door and to vault in front lightwell; erection of 1.8m high brick partition wall in rear garden to separate the gardens between basement flat and upper floor maisonette.

Internal alterations include- rearrangement of rooms and partitions, installation of secondary glazing to all windows as well as renewal of electrical and mechanical services (boiler flue, extract fan terminals).

Externally the existing rear door and windows are both modern and as such there is no objection with replacing these with windows and doors. The design of the new fenestration would satisfactorily relate to the age and style of the building and would therefore preserve the character of the building and area.

The new security gate beneath the front elevation steps would improve security and would be suitably set back under the ground floor bridge so as to not be obtrusive in the street scene. The additional security gate and opening into a basement vault will have not effect on the building or streetscene. The new 4 panelled front door would match the age and style of the building. Overall the various alterations do not harm the appearance of the building or character of the conservation area. The new garden wall will not harm neighbour amenities.

Internally the flat contains no historic fabric or features. The historic layout is intact but would be unaffected by the proposed works. No harm would be caused to the special interest of the building by the proposed internal alterations which are considered necessary and appropriate to upgrade the building for habitable use. As such the proposed works would not affect the significance of the listed building and no objection is raised to the scheme
