siting of radio base stations. This application has been prepared in accordance with those commitments.

Following that early consultation, we have reviewed our network development proposals in this area and have evaluated potential site shares, existing structures and buildings in a sequential approach, as well as your development plan. The above site that is the subject of this application is identified as the most suitable site option and design that balances operational need with local planning policies and national planning policy guidance.

Furthermore we would like to assist the Council and would like to arrange a presentation or meeting with your officers and members to discuss the issues if appropriate.

We are committed to improving our relationship with all Local Planning Authorities and we would be happy to provide any additional information in relation to this application or in general.

We look forward to receiving your acknowledgement and decision in due course.

Yours faithfully,
