RE: Pre Application Meeting 19 Chalcot Crescent Ref 6012

Antonia Powell
To archplan architects
Dear Mr Down
Thank you for your message and I am sorry to have missed you on the telephone. Thank you also for taking the time to show me around No. 19 Chalcot Crescent earlier this week.
The property, as you know is Grade II listed. The interior has undergone late 20th century refurbishment and I am of the opinion that the plaster ceiling roses we discussed on the first floor are likely to be recent installations. Ceiling roses as decorative as this would not normally be found in back rooms to the upper floors. Much of the staircase joinery, including the hand rail and banisters has been replaced although it looks to me as if the actual stairs are original. The quality of the replacement joinery is good. A number of the doors and architraves to the upper floors may also have been replaced.
As we discussed I have had an opportunity to review the floor plan and consider the existing historic details and my comments on the proposals are as follows:
Top floor
I note that some changes to the original floor plan of rear rooms are likely to have taken place sometime during the later part of the twentieth century. With this in mind the inclusion of a modest shower room between the front and rear bedrooms may be possible. I do not remember seeing fire surrounds to these rooms but this will need confirming and my comments may be revised in light of additional information.
The cornicing to the stair well ceiling looks to be original and the historic proportions of the top landing are retained. As such I consider alterations to the floor plan to be detrimental to the spatial quality of the top landing and with the associated loss of historic fabric this part of the proposal would be unlikely to have my support.
First floor
The historic introduction of a bathroom to the back room has involved a substantial amount of additional joinery which appears to date from the late 20th century. The chimney breast is subsumed within the modern joinery and although the historic ceiling cornice is retained in situ the original layout of the room is somewhat compromised.
The proposed dressing rooms will not, in my opinion, cause further harm in listed building terms, to the spatial quality of the room. Services and pipes etc have already been introduced and providing the existing runs are reused wherever possible to avoid any additional harm to the fabric I have no objections to this part of the proposals.
The proposed basin within a recess to the smaller bathroom however is considered to be detrimental to the general layout and with the loss of a section of the original partition wall, is unlikely to have my support.
Upper ground floor
No change
Lower Ground floor
This part of the scheme is the most involved and has the potential to cause the greatest harm to the special interest of this listed building. I consider the rear elevation to be of importance as it retains its original openings and very little alteration to the original brickwork. Internally the stair case also appears to be original and the internal walls follow what looks to be the original layout of the basement. As we discussed the joinery of the windows, in my opinion, is original with fine box shutters and slender glazing bar sections. All these elements I believe, contribute to the historic significance of the building.
The proposed covering in of the side garden area is unlikely to effect the special character or appearance of the building and in principal I have no objections to this element of the proposals.
The removal of a substantial amount of the external walls to create large openings is, in my opinion, the most contentious element of the scheme. The loss of the historic openings, historic joinery and brickwork will, in my opinion, cause substantial harm to the appearance and character of the building and is unlikely to have my support. There may be scope however to create an opening to the side wall beyond the base of the staircase leading to the proposed covered conservatory area.
The removal of internal walls to the extent shown is also unlikely to have my support. As we discussed I would expect a clear indication of the historic layout to be retained in the form of masonry nibs and down stands.
The extent of retained historic joinery will need to be confirmed before I am able to advise you on the proposed changes to the stair case. If the joinery dates from the 20th century refurbishment then the reconfiguration may be acceptable. If the joinery is found to be historic then I would expect the stair to remain unaltered.
The proposed lowering of the garden level and changes to the utility space and w.c. will not impact on the historic interest and as such there is no objection.
I am on leave as from today but hope these comments are helpful. I am aware that your clients may find this report disappointing in parts however I will be happy to discuss revisions when I am back in the office and hope then to achieve a scheme which will then have my support.
Please note these are the informal views of an officer of the council and would not prejudice any subsequent decision taken by the council.
