Bloomsbury Conservation Area Appraisal.**

## Assessment

### Shopfront alterations

The proposed shopfront is considered to preserve the visual character and appearance of this part of the Bloomsbury CA with the shopfront being well proportioned and broadly complying with council design guidelines. The proposed timber material is considered sympathetic and no objections are raised in design and conservation grounds.

### Signage

The proposed signs do not obscure any architectural features of the building and are considered acceptable in terms of proportions and design. It is not considered that any of the signs would be unduly obtrusive in the street scene or disturb residents or occupiers.

Although illuminated signs are not generally considered suitable for conservation areas, external illumination in this site is not considered to have a harmful impact on the character and appearance of the building and the wider conservation area.

The location of the signage is not considered harmful to either pedestrian or vehicle traffic. The proposal therefore raises no public safety concerns.

**Recommendation:** Grant planning permission and advertisement consent.
