

Trial Pit TP1 At Party Wall With No.15

Trial Pit TP2 At Party Wall With No.19

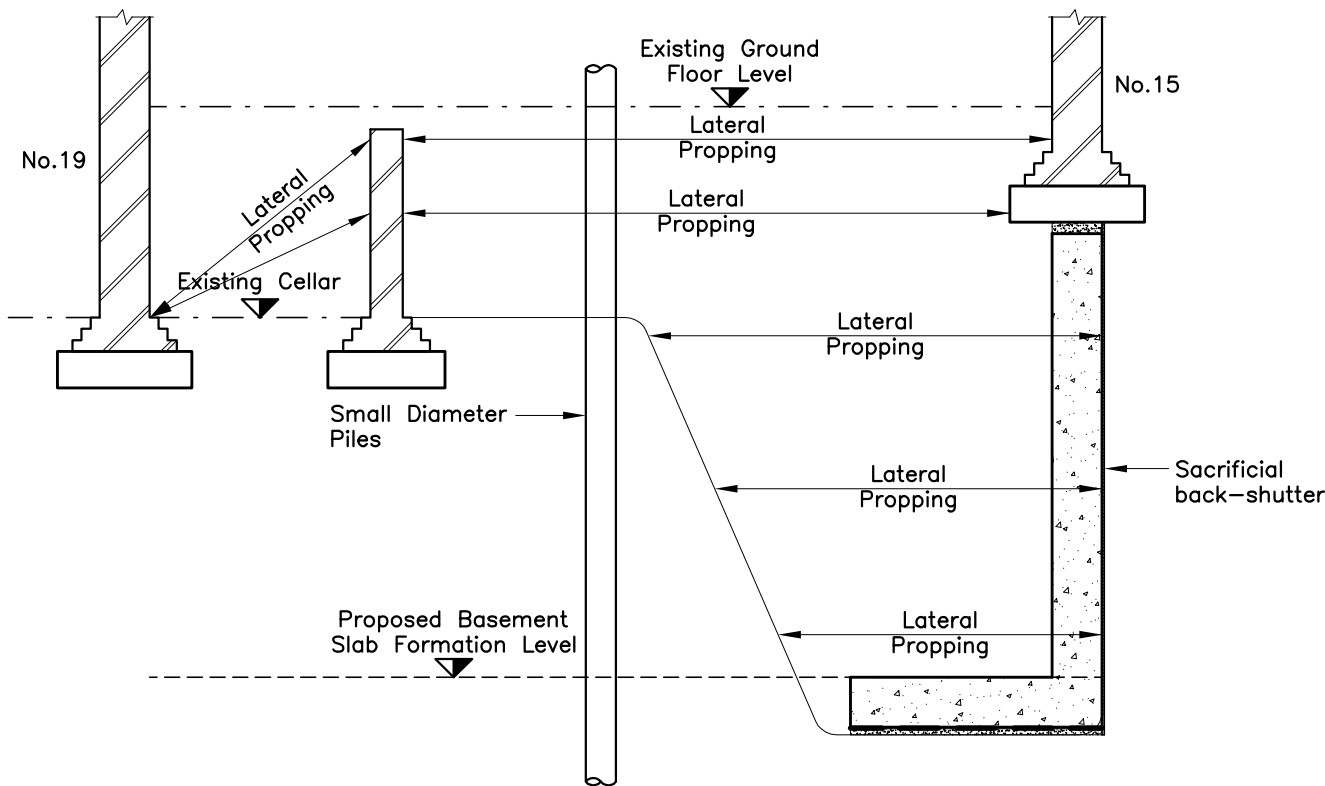

Step 11: Install piles.

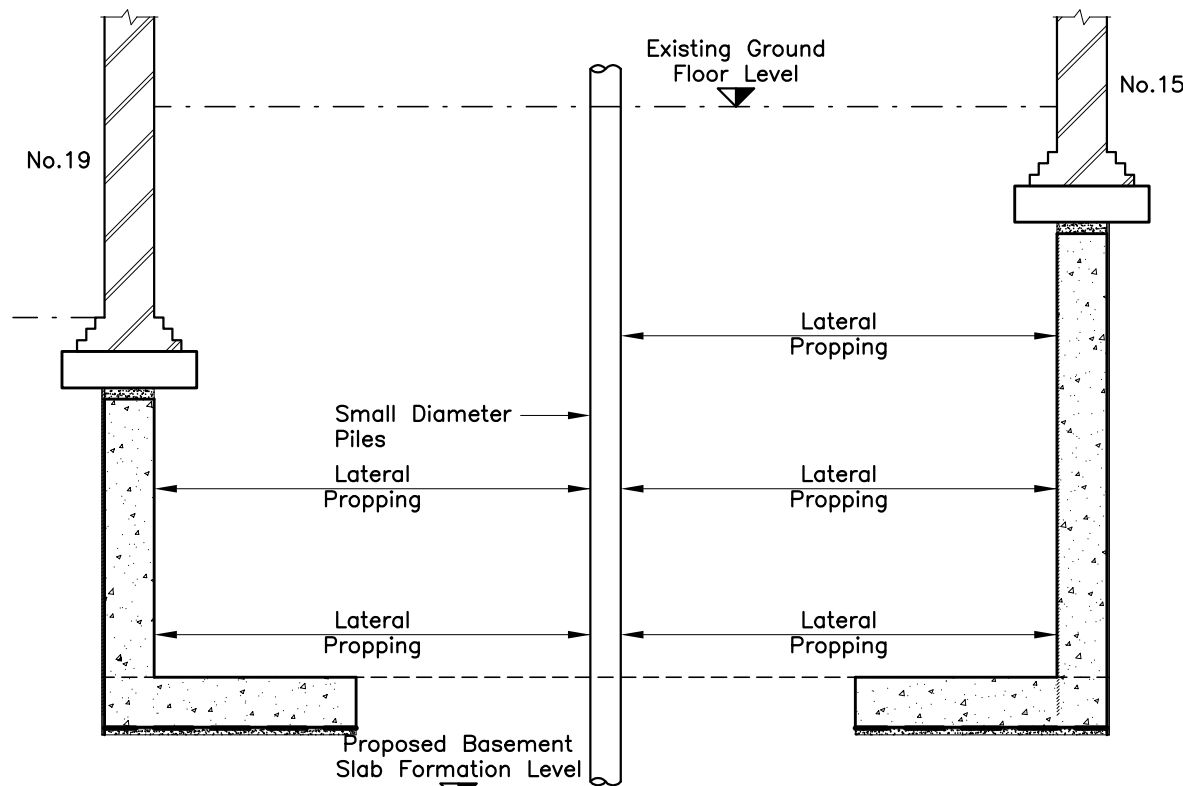

Step 12: Progressively excavate raised volume adjacent No. 19, whilst progressively installing lateral propping, all within width of proposed working-space for first pin of underpinning.

Step 13: Continue excavation within same width, and remove soil from below party wall, whilst progressively installing further lateral propping, and sacrificial back-shutter.

Step 14: Install reinforcement, and construct base of retaining wall, and construct underpinning stem of retaining wall.

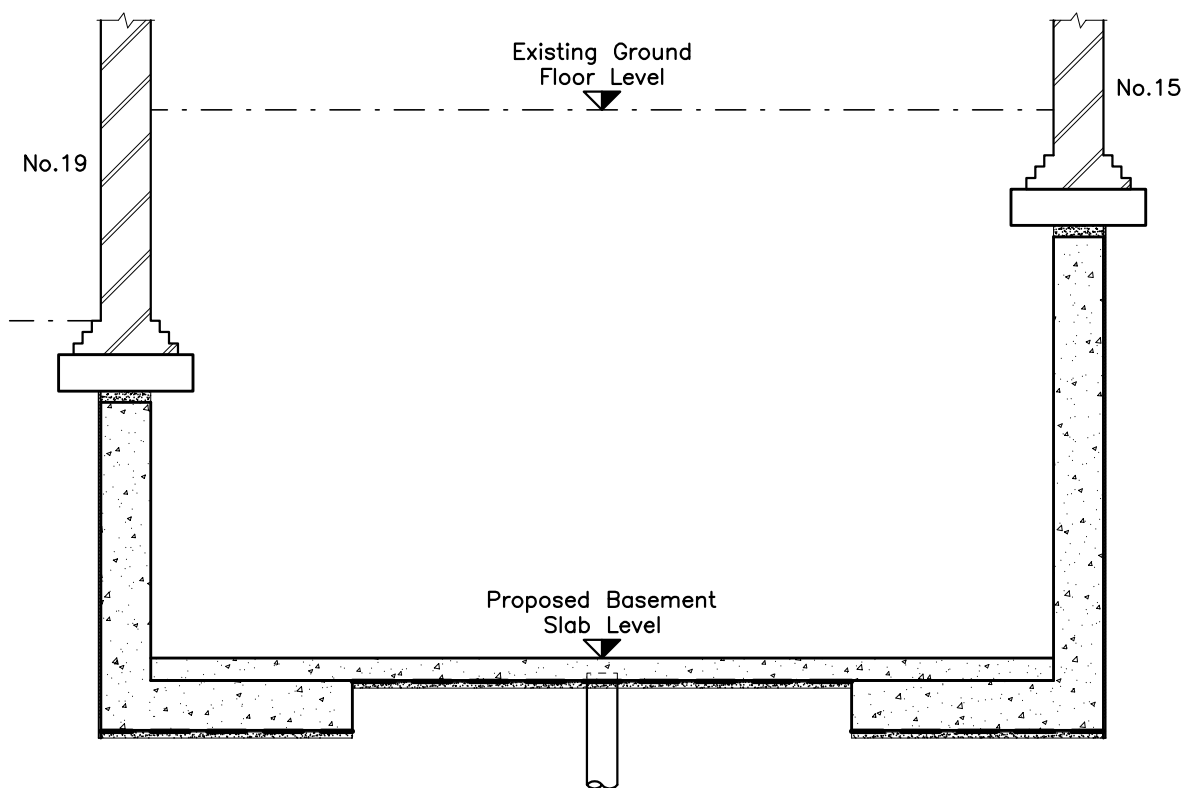

Step 15: Systematically repeat steps 2, 3 and 4 to completion of all underpinning retaining walls bordering original raised volume.

Step 16: Progressively excavate from cellar level adjacent No. 15, whilst progressively installing lateral propping, all within width of proposed working-space for first pin of underpinning. (Remove intermediate brickwork retaining wall as works advances.)

Step 17: Systematically repeat steps 3 and 4 to complete first section of base and retaining wall.

Step 18: Systematically repeat steps 6 then 3 then 4, to completion of all underpinning and retaining walls.

Step 19: Remove lateral propping, and cut down piles to cut-off level.  
Step 20: Lay reinforcement for basement slab, and cast basement slab.
