

ArtBox Structures

- The structures will be actual size fibre glass moulds of the K6 telephone box.
- The structures will not have windows, the entire structure is a solid white fibre glass mould. No one can get inside the structure.
- The fibre glass structure will be fixed to a concrete base weight
- The base will act as the plinth to ensure the ArtBox is safely held in position as per advice by Capita Symonds
- The base plinth will display a plaque with details about the artist, the sponsor of that ArtBox and the project identity as shown in the corner of this page.
- Artworks and sponsor information for each box will be available in May 2012.
