

# CABRIO® balcony

The CABRIO® balcony turns a roof window into an instant balcony in seconds. A great way to add value and a real wow factor to a property.

- The upper section is top-hung and opens outwards whilst the bottom section unfolds into a glazed balcony with side railing.
- Can be easily combined with top-hung and fixed sloped windows to increase the daylight and view.
- Warmth of natural pine with long lasting triple coat finish.
- Double and triple units now include EKY (100mm) support trimmers.
- All glazing used has laminated inner pane for additional safety.
- Top-hung section rotates 180° and locks in place for easy cleaning of the outer pane.
- Clear and clean coating on toughened outer pane keeps the glazing cleaner for longer.
- 10 year VELUX guarantee.

External frame size (nominal w x h) cm

## Planning Permission

Planning permission is not normally required. However, permission is required where you extend or alter the roof space and it exceeds specified limits and conditions.

Under new regulations that came into effect from 1 October 2008 a loft conversion for your house is considered to be permitted development, not requiring an application for planning permission, subject to the following limits and conditions:

- A volume allowance of 40 cubic metres additional roof space for terraced houses\*
- A volume allowance of 50 cubic metres additional roof space for detached and semi-detached houses\*
- No extension beyond the plane of the existing roof slope of the principal elevation that fronts the highway
- No extension to be higher than the highest part of the roof
- Materials to be similar in appearance to the existing house
- No verandas, balconies or raised platforms
- Side-facing windows to be obscure-glazed; any opening to be 1.7m above the floor
- Roof extensions not to be permitted development in designated areas\*\*
- Roof extensions, apart from hip to gable ones, to be set back, as far as practicable, at least 20cm from the eaves

\*Bear in mind that any previous roof space additions must be included within the volume allowances listed above. Although you may not have created additional space a previous owner may have done so. [Calculate the area and volume of your works using our Volume Calculator](#)

\*\*Designated areas include national parks and the Broads, Areas of Outstanding Natural Beauty, conservation areas and World Heritage Sites.

**Please note:** the permitted development allowances described here apply to houses not flats, maisonettes or other buildings. [View guidance on flats and maisonettes here.](#)

## Mini guide to loft conversions (England only)

Common Projects  
Loft Conversion

## Building Regulations

Building regulations approval is required to convert a loft or attic into a liveable space.

[Read more about building regulations relating to loft conversions.](#)

## Protected Species

Work on a loft or a roof may affect bats. You need to consider protected species when planning work on this type. A survey may be needed, and if bats are using the building, a licence may be needed.

[Contact Natural England for more advice.](#)
