Culture and Environment Directorate
London Borough of Camden
Town Hall extension, Argyle Street, London WC1H

11th May 2012

Dear Tony

Planning application - 2012/1453/P - 57 Pratt Street

Complementary to our current Planning Application - 2012/1453/P - 57 Pratt Street, we would greatly appreciate your adding the following information from the previously approved application ref. 2009/3869/P, for the Headhouse, in support of this application:

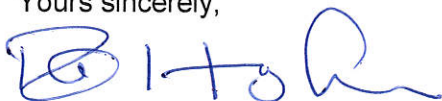

- Planning Statement
- Construction Traffic Management Plan
- Environmental Study

We have not altered the pertinence of these documents in anyway. The only change which has evolved, relative to the Headhouse, is confined to the rear (North) elevation. Immediately adjacent to the former Camden Training Centre building (ie. 57 Pratt Street.), the parapet is reduced to reveal the single storey nature of the accommodation immediately behind. This being to assist secondary means of escape from above.

Note: The frontage onto Pratt Street and Royal College Street remain exactly as already approved as described in the Planning Statement ref.7.5.1 & 7.5.2. The (rear) North elevation was described as largely obscured from view (ref. 7.7.2) and we do not believe an addendum is necessary to change anything in the Statement.

Please deposit this letter on file but we hope you agree that we have not undermined the content of the above supporting documents.

Yours sincerely,

Richard Hughes
