- Letter from Knapp Hicks & Partners Ltd referring to the WSP Environmental Assessment which shows that the site is of moderate to low risk in relation to contamination. It is suggested that any further investigation with regard to contamination be dealt with by condition as it will not be possible to carry out any further investigative works until the building has been demolished.

The client has instructed Colvin & Moggridge to prepare details in relation to the green roofs as well as the green walls and this information will be forwarded to you within the next few days. However, I would be grateful in the meantime if the application could now be registered.

Yours sincerely
